

This return has proved most useful and at some offices the standard is already being approximated to. It has shewn that the operating staff is in excess of what is really necessary under the new conditions, and the cry of "shorthanded" is now rarely heard when delays have to be explained.

(iii) *The Circulation List*.—This is a statement kept in each office showing the route to be given to outgoing messages according to their destination. It is of course chiefly useful in large offices with many outlets. The route chosen is that which is most direct and involves fewest re-transmissions.

43. Other reforms affecting traffic may be mentioned in brief:—

- (i) Shortening of the names of offices both in the nomenclature given in the *Telegraph Guide*, and in the code or abbreviated form in departmental use.
- (ii) The substitution of "Reply Paid" voucher forms for "passes." These are self-contained, being a voucher and telegram form in one.
- (iii) The hour of "first" delivery of telegrams altered from 5 to 6 A.M.
- (iv) The discontinuance of the signalling of the number of figures contained in a telegram.
- (v) The initials instead of the full signature of telegraphists recorded on telegrams in token of receipt or despatch of same, except in the case of Money Order telegrams when the full signature has to be written.
- (vi) Reduction in the cost of "Sent" telegram form books for sale to the public, from four annas with counterfoil and two annas without counterfoil, to two annas and one anna, respectively.
- (vii) The reduction in the charge for an Inland Advice of Delivery by telegram from one rupee to six annas.
- (viii) The fees for the registration of abbreviated addresses to be leviable annually and six-monthly instead of by the calendar year.
- (ix) The reduction in the period of preservation of undelivered Inland telegrams in telegraph offices from six to two weeks.
- (x) The despatch to the Government Telegraph Check Office, Calcutta, of the disposed-of telegrams daily, instead of twice weekly as formerly.

44. Training Classes have not escaped attention in the general over-hauling. More instruments have been fitted for instruction. A booklet has been prepared and issued for the purpose of more efficiently equipping the learners before they are placed on actual duty. The standard rate of signalling has been raised from 20 to 25 words a minute. More attention is now paid to the attitude and position of operators when working the key. Formerly the key was fitted on the left hand side of the operator, who rested his right arm on the table athwart the body when manipulating the key. This was a cramped style. The operator is now taught to sit up comfortably in his chair and work the key on the right hand side of his body allowing play to the whole arm and holding the knob of the key lightly in the fingers. A straight key has been brought into use more suitable to the new position than the curved American key. Training Classes.

45. In July 1908 the Deposit system of Accounts, referred to in paragraph 36 of the Report for last year, was extended to all private paid telegrams. Deposit systems of accounts. Towards the close of the year, the Government of India decided to lower the rate of commission for the upkeep of deposit accounts from 1 per cent on the gross value of the messages accepted to Re. 1 for every 25 telegrams, to take effect from 1st April 1909. A similar arrangement has been applied to accounts with the Press also. Each newspaper makes a permanent deposit of a sum sufficient to cover the estimated cost of its press bill which may now be rendered fortnightly or monthly as desired. This arrangement protects the revenue from possible loss and is adopted from the procedure of the British Post Office.

**Accounting.**

46. Formerly the message revenue and statistics were compiled in the Check Office from a register kept in each office. Particulars of class, value, and destination, of every sent telegram, was entered and the register went to the Check Office with the message drafts twice a week. This somewhat cumbersome system disappeared in July 1908 when daily dockets showing only the number of telegrams dealt with were introduced in place of the register and the revenue is now estimated in the same manner as in the British Post Office. That is, briefly, by means of a special count, which is made during two selected weeks of the year to arrive at the average value of messages paid for at the usual rate. This multiplied by the actual number of messages, which is totalled from the daily dockets, gives the principal item of inland message revenue for the year. Revenue on Foreign messages is computed as before from the Frontier office registers. The simplified method of accounting has enabled considerable economies both in stationery and clerical staff to be made in telegraph offices and also in the Check office.

47. Other economies of staff are being gradually effected in the Check office.

**Revision of inland tariff.**

48. Before the 1st of January 1909 the Inland tariff stood as follows :—

*Inland (Private and State) Telegrams.*

Class.	Unit No. of words.	Unit rate.	Each additional word.	Address.
		Rs. A. P.	Rs. A. P.	
Urgent ... ..	16	2 0 0	0 4 0	Charged for.
Ordinary ... ..	16	1 0 0	0 2 0	Ditto.
Deferred ... ..	10	0 4 0	0 1 0	Ditto.

For some years the message revenue of the Department had suffered increasingly from the growing preference shewn for the 4-anna telegram as its treatment became less deferred. It had never been expected that it would pay, but the higher paid classes, Ordinary and Urgent, were to make up for what was lost on it. The latter however kept gradually losing in favour with the public. In 1907-08 the proportions were :—

Urgent 5·8 per cent. Ordinary 11·01 per cent. Deferred 83·19 per cent.

The matter was long debated and was made the subject of reference to the Chambers of Commerce, and with effect from 1st January 1909, a new tariff for Inland telegrams was introduced under the authority of the Government of India, Department of Commerce and Industry, Resolution No. 11462 11502-244, dated Calcutta, the 18th December 1908; the classification of telegrams and the charges for their transmission being as follows :—

*Inland (State and Private) Telegrams.*

Class.	Unit No. of words.	Unit rate.	Each additional word.
		Rs. A. P.	Rs. A. P.
Express ... ..	12	1 0 0	0 2 0
Ordinary ... ..	12	0 6 0	0 0 6

The average number of words in the Deferred telegrams had stood at 12 approximately, for some years. The charge for the average telegram in the new ordinary class is therefore exactly as it was under the old tariff, but the cost for each additional word above that minimum, is only one half of what it was before.

The higher class is only one half of its former cost, provided the new minimum number of words is not exceeded; and each additional word in excess of the minimum number costs but half what it did formerly.

Express telegrams take precedence of Ordinary telegrams during transmission along the wires but otherwise both classes are treated exactly alike.

The rates for Press telegrams have not been changed but the two classes are now styled "Express" and "Ordinary" instead of "Ordinary" and "Deferred."

49. The Indo-European Telegraph Department have adopted the Indian Inland Telegraph rules and rates for telegrams exchanged between India and their offices in the south of Baluchistan and on the Mekran Coast, with effect from the 1st of April 1908, with a view to assimilate their telegram rates to those in force in the offices of this Department in the north of Baluchistan.

Revision of rates

50. With effect from the 1st of February 1909, a fee of Rs. 4 per telegram is levied in addition to the ordinary rates for telegrams, whether inland or foreign, on telegrams transmitted by radio-telegraph between Calcutta and the Pilot vessel at the Sandheads (Hooghly).

51. From the 13th April 1908, the rates for telegrams to places in East and South Africa from India and Burma *via* Bombay and Aden were reduced. The reductions to the principal places are given below:—

Name of places.	FORMER RATE PER WORD FROM INDIA OR BURMA.			REDUCED RATE PER WORD FROM INDIA OR BURMA.		
	For Private Telegrams.	For British Indian and Colonial Government Telegrams.	For Press Telegrams.	For Private Telegrams.	For British Indian and Colonial Government Telegrams.	For Press Telegrams.
	Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.
CAPE COLONY, ORANGE RIVER COLONY and TRANSVAAL.	2 14	1 7	1 3	1 12	0 14	0 14
COCOS (KELING) and RODRIGUES ISLANDS	2 13	1 7	...	2 4	1 2	...
LORENZO MARQUES MOZAMBIQUE (TOWN), BEIRA (TOWN) and QUILIMANE.	2 13	1 7	...	1 12	0 14	...
MADAGASCAR and RE-UNION.	2 12	1 13	...	2 7	1 10	...
MAURITIUS and SEYCHELLES.	2 13	1 7	...	1 11	0 14	...
MOBASSA and ZANZIBAR.	2 1	1 1	...	1 10	0 13	...
NATAL:—						
Durban	2 13	1 7	1 2	1 11	0 14	0 14
Other offices	2 14	1 7	1 3	1 12	0 14	0 14
NYASSALAND	3 2	1 8	...	2 1	0 15	...
RHODESIA:—						
Northern and North Western.	3 2	1 7	...	2 1	0 14	...
Southern	3 0	1 7	...	1 14	0 14	...

52. The following statement shows the amount of news-free and concessional traffic during the year:—

News-free and concessional telegrams.

	No.	Pro forma Value. Rs.
Mail steamer reports	32,632	58,764
Reuter's Government and press messages	125,585	63,113
Indian News Agency	54,792	41,206
French Government service messages	1,747	8,628
Portuguese Government service	2,572	11,841
Kalat State	877	1,189
Kashmir State	8,510	17,546
British, Indian and Colonial Government messages	10,604	28,839
Total	237,319*	2,31,126
Total for 1907-08	26,759	2,20,909

\* Increase due to revised method of numbering multiple telegrams, *vide* paragraph 20.

Classification of inland telegrams.

53. The abstract given below shows the number and value of inland sent telegrams, despatched during the year, under the various classes and divided up so as to show the traffic under the old and new tariffs :—

Class.	URGENT.†		ORDINARY.		DEFERRED.†		TOTAL.	
	No.	Value.	No.	Value.	No.	Value.	No.	Value.
		Rs.		Rs.		Rs.		Rs.
State ... { (a)	86,772	5,14,997	1,42,599	2,01,081	492,036	5,98,717	721,407	13,15,695
(b)	37,803	1,22,217	189,149	1,49,762	...	...	226,952	2,71,979
Private ... { (a)	42,378	8,57,385	721,511	8,44,851	6,76,515	26,28,827	7,91,037	43,31,063
(b)	379,773	4,92,564	2,437,141	10,71,381	...	...	2,816,914	15,63,945
Press ... { (a)	...	...	39,497	44,803	91,053	97,742	130,550	1,42,545
(b)	9,845	7,948	22,098	27,184	...	...	31,933	35,132
TOTAL ... { (a)	510,420	13,72,382	903,607	10,91,635	7,348,245	33,25,286	8,762,332	57,89,303
(b)	427,481	6,22,729	2,648,378	12,48,327	...	...	3,075,799	18,71,056
GRAND TOTAL ...	937,901	19,95,111	3,551,985	23,39,962	7,348,245	33,25,286	11,838,131	76,60,359*

(a) For the period 1st April to 31st December 1908 under the old inland tariff.

(b) " " " 1st January to 31st March 1909 under the new inland tariff.

\* Exclusive of Rs. 53,555 on account of abbreviated addresses, and Rs. 14,004 on account of debit adjustments.

† The deferred class was abolished and the urgent class styled "express" from the 1st of January 1909.

Proportion of  
Island traffic under  
each class.

54. The following statement shows the percentage of inland sent traffic for the various classes during the last three years:—

[illegible]

55. The table below shows the number and value of telegraphic money order advices dealt with during the last five years :—

Year.	India.		Indo-Ceylon. Number of advices.				Telegraphic money order advices.
	No.	Value. Rs.	Out- going.	Incom- ing.	Total.	Value. Rs.	
1904-05	...	196,315	1,96,315	1,590	21,074	22,664	22,664
1905-06	...	214,002	2,00,232	1,426	19,428	20,854	20,854
1906-07	...	259,648	1,95,784	1,559	18,181	19,740	19,740
1907-08	...	300,198	2,05,295	1,406	15,778	17,184	17,184
1908-09	...	355,600	2,32,962	1,583	14,364	15,947	15,947

56. The Telegraph Department continued to receive the usual fixed fee of one rupee for each telegraphic money order advice exchanged between India and Ceylon.

The number and value of Indian advices during the year are shown below :—

	No.	Value. Rs.
Classed as urgent (express)	...	110,325
„ ordinary, (from 1st January)	...	56,775
„ deferred, (up to 1st January)	...	188,500
Total	...	355,600

57. The following statement shows the total number of sent telegrams, the total number of signalling operations entailed in their despatch from the office of origin to destination, with the necessary repetitions at intermediate offices, and lastly, the average number of signalling operations per sent telegram, for the past five years :—

Signalling  
operations.

Year	Total number of sent telegrams paid, service, and free.	Total number of signalling operations.	Average number of signalling operations per sent telegram.
1904-05	9,977,694	50,228,813	5'03
1905-06	11,578,870	56,048,978	4'84
1906-07	12,703,715	61,918,506	4'88
1907-08	14,266,942	70,407,120	4'93
1908-09	14,327,396	66,280,389	4'62

58. A new cable having been laid and opened for international telegraph traffic between Batavia and the Cocos Island on the 13th April 1908, it was arranged that, in cases of interruption or congestion of traffic on the direct Bombay-Aden route, telegrams would be transmitted to East and South Africa by the Madras-Batavia-Cocos route at the same rates as *via* Bombay-Aden.

Communication  
with Foreign  
countries.

59. Communication with Europe *via* Suez was maintained uninterruptedly throughout the year. The Teheran route was interrupted for 822 hours as against 173 hours in the previous year. The Turkish route was interrupted

for 3,363 hours as compared with 3,988 hours in the previous year. Details of the traffic which passed over these routes during the year are given in Appendices C. and D. From the 20th January 1909 the Karachi cable office started working London direct *via* the Indo-European route as a normal arrangement thereby saving repetition at Teheran.

60. Communication between India and Siam over the Moulmein-Bangkok line *via* Kanburi was interrupted for 765 hours against 570 hours in the previous year beyond the Indian Frontier, and 114 hours as against 143 hours in the previous year within the Indian Frontier. That *via* Raheng was interrupted for 551 hours beyond, and 114 hours within the Indian Frontier, as compared with 316 and 124 hours, respectively, during 1907-08.

61. The land route to China *via* Bhamo was interrupted 35 times beyond the Indian Frontier for 1,538 hours against 38 times and 2,565 hours in the previous year. There were two interruptions lasting 29 hours within the Indian Frontier compared with *Nil* in the previous year.

Meteorological Observation Offices.

62. On the 31st March 1909, there were 54 Government telegraph offices which were also Meteorological observation offices.

Signalling establishment.

63. At the close of the year the signalling establishment stood as follows:—

Deputy Superintendents	...	...	...	50
Departmental Telegraph Masters and Signallers	...	...	...	2,871
Unattached List	Warrant Officers	...	...	7
	Non-commissioned officers	...	...	13
Military Telegraphists	...	...	...	538
Postal employés	...	...	...	3,094
Total				6,573
Total for 1907-08				6,567

The average normal increase in the cost of the Signalling establishment, *vide* Appendix B, during the five years ending 1907-08 has been 8.01 per cent, but the increase in the year under review is 5.71 per cent only. This fall is due to the large reduction in the Signalling staff, including clerical staff in signal offices, as compared with the previous year and shows that the increase of Rs. 5,06,671 under this head mentioned in paragraph 4 practically represents the entire amount due to the reorganisation.

Rifle Volunteers

64. The number of volunteers on the rolls in the Department during the year was 988, being a decrease of 98 as compared with the previous year. Of this number 621 were extra-efficient, 289 efficient and 78 non-efficient. By way of encouragement, prizes aggregating Rs. 1,450 were granted for proficiency in drill and shooting.

Of 82 men on the rolls of the "D" or Telegraph Company of the Bombay Volunteer Rifles, all except one were returned as extra-efficients, and 75 of this number passed the ambulance examinations. This Company has also held its own at the Regimental sports and are the winners of the following trophies:—

1. The Bayley Company Shield for Team shooting.
2. The Bayley Challenge Cup, for the most efficient Company in the Corps.
3. The Highland Challenge Cup, for the falling plates competition.
4. The Tenant Memorial Marksman's Cup and Medal won by Sergeant Aug. D'Silva.
5. The Tenant Memorial Sergeant's Cup and Medal won by Sergeant Aug. D'Silva.

6. The Tenant Memorial Drill Cup and Medals won by 10 members of the Company who put in the maximum number of drills.
7. Team Marching Competition (Kurla to Santa Cruz) 1st and 2nd prizes won by two teams from the Company.

The annual competition for 1908-09 for the Volunteer Challenge Shield presented by His Royal Highness the Prince of Wales, which was won by this Company the previous year, did not take place this year owing to only one team entering, namely, the "Telegraph Team" of the Bombay Volunteer Rifle Corps. This Company therefore holds the Shield for another year.

The excellent results achieved during this and other years, by this Company, are due to the keen interest in the men evinced by Mr. N. U. K. Leslie, the Superintendent in charge of the Bombay Office.

The Telegraph Officer's Challenge Shield and the Brind Memorial Cup competed for annually by Telegraph Teams throughout India and Burma were won this year by the 1st Team of the "B", or Telegraph Company of the Agra Volunteer Rifles, the cup going to Lance-Corporal Bailey who made the highest score.

The "F", or Telegraph Company, of the 2nd (Presidency) Calcutta Volunteer Rifles won the inter-company shield open to both Battalions. As this is the best trophy in the Corps, they are to be congratulated on the event.

65. Certificates of proficiency in telegraphy were granted to 329 soldiers ; and at the close of the year 306 were under training. The corresponding numbers for the previous year were 303 and 340, respectively. Training of soldiers in Telegraphy.

By an arrangement with the Military authorities, Military Telegraphists in reserve with their regiments are now required to attend a training class annually on the 1st of July for an examination in telegraphy, inefficients being retained in the class for a refresher course which may extend to a month. It is hoped by this method that all who hold certificates will be kept at a useful standard of efficiency.

66. The following statement shows the number of combined offices open at the end of each of the last five years, and the number and value of telegrams sent from them as well as the total number of signalling operations during those years :— Post Office agency.

Year.	Number of combined offices.	Number of paid telegrams.	Value of paid telegrams.	Total number of signalling operations.
1904-05 ...	1,917	4,024,140	Rs. 26,70,101	9,920,466
1905-06 ...	2,029	4,717,436	29,20,347	11,093,201
1906-07 ...	2,158	5,272,276	30,97,403	12,068,765
1907-08 ...	2,265	6,123,137	34,64,784	13,863,294
1908-09 ...	2,378	5,754,069	32,19,634	13,024,988

67. Certificates of proficiency in telegraphy were granted to 577 postal employes, and at the close of the year 439 were under training. The numbers for the previous year were 529 and 347, respectively. Training of postal employes in telegraphy.

#### EXTENSION AND MAINTENANCE OF LINES.

68. Appendix E shows the mileage of line and wire maintained by this Department at the close of each quinquennial period from 1850-51 to 1894-95 and at the end of each year since. Appendix A shows the purposes for which the line, wire and cable were used at the close of the years 1907-08 and 1908-09. Extent of system. App. A and E.

69. The net increase in the extent of the system during the year was 1,125 miles of line and 8,651 miles of wire, including cable (*vide* paragraph 8). Additions during year.

**Departmental Works.**

70. The following were the principal Departmental works carried out during the year; extensions of lines under fifty and of wires under a hundred miles in length being omitted:—

			Miles of lines.	Miles of wire.
<i>New Construction—</i>				
Kharsia-Ambicapur	...	...	105	105
Dhamtari-Jagdalpur	...	...	134	134
<i>Extra wires—</i>				
Nahder-Secunderabad	...	...	...	169
Bangalore-Arsikere	...	...	...	108
Calcutta-Chittagong	...	...	...	366
Calcutta-Raniganj	...	...	...	216
Jubbulpore-Piparia	...	...	...	111
Ahmedabad-Wadhwan Railway Station	...	...	...	126

**Reconstruction.**

An estimate was sanctioned by the Government of India for extensive special repairs in connection with the improvement of the lines carrying the Calcutta-Rangoon wires. Much progress has been made with this undertaking and it will be completed in 1909-10.

The total reconstructions during the year amounted to 851.32 miles of line and 3,938.35 miles of wire.

**Cables.**

71. Fifteen sub-marine type cables across rivers, aggregating 26 miles in length, were laid during the year by the Department, either for new circuits or as renewals. The most important repair effected was that of the Ramree Cable No. 2, 14.38 miles; failing repairs, it is probable that radio-telegraphic communication between Akyab and Kyaukpyu would have been resorted to.

72. Underground cables, aggregating nine miles in length, for telegraph and telephone purposes, were laid during the year, in Bombay and Calcutta. Of these nine miles, six miles were laid by this Department and three by Messrs. Callender's Cable and Construction Company, Limited.

73. Aerial Telephone cables, aggregating six miles in length, were erected during the year in the Bombay, Punjab and United Provinces Divisions by this Department.

**Interruptions to communication.**

74. The interruptions to communication which occurred during the year are classified below according to the causes to which they were attributed:—

			No.	Duration, Hours.
<i>Preventable causes—</i>				
Faults on lines and cables	...	...	317	4,419
<i>Unpreventable causes—</i>				
Cyclones and exceptional storms	...	...	422	7,706
Floods	...	...	51	1,839
Lightning	...	...	98	1,427
Fires	...	...	59	858
Trees falling other than by cyclones, etc.	...	...	306	5,022
Birds and animals	...	...	593	7,093
Malice	...	...	150	2,634
Other unpreventable causes	...	...	616	8,794
Total on lines and cables			2,612	39,792
Faults in offices	...	...	224	3,052
Unknown causes	...	...	760	8,410
Grand total			3,596	51,254
Total for 1907-08			3,894	50,399

**Compared with previous year.**

75. As compared with the previous year, the interruptions which occurred in 1908-09 show a decrease of 298 or 7.65 per cent in number and 2,736 hours or 5.07 per cent in aggregate duration. These results are very satisfactory on the whole, following as they do on similar marked decreases last year. The average duration is slightly greater than last year.

**Preventable causes. Unpreventable causes.**

76. Faults from preventable causes show a decrease from 341 lasting 4,650 hours to 317 lasting 4,419 hours and those from unpreventable causes from 2,584 lasting 38,270 hours to 2,295 lasting 35,373 hours.

77. Faults in offices show a slight increase of 2 in number and 152 hours or Faults in offices. 5'24 per cent in duration.

78. Faults due to unknown causes have also increased by 13 or 1'74 per cent Unknown causes in number and 240 hours or 2'93 per cent in duration.

79. Karachi was entirely cut off from the Indian lines in July owing to a Floods. sudden rise of the Malir River which washed away the north embankment of the bridge and totally wrecked the telegraph lines. To meet similar emergencies in future, an arrangement has been made with the Indo-European Telegraph Department for the use of their Central Persian line, to enable traffic to be sent on to the Indian lines through Robat and Quetta.

### ELECTRICAL.

80. A new pilot steamer, the 'Lady Fraser' arrived in Calcutta in June Radio-Telegra- and was fitted with radio-telegraph apparatus. The two pilot steamers being phy. both fitted with apparatus, radio-telegraphic communication from Calcutta to the Sandheads is now continuous. Radio-telegraph stations have been opened at Mergui and Victoria Point and communication between these points is satisfactory except at times of severe atmospheric disturbance. The temporary radio-telegraph station at Bassein has been strengthened by the erection of a larger aerial which has greatly improved communication with Diamond Island. When atmospheric disturbances are not severe Bassein can communicate direct with Port Blair, a distance of 383 miles, of which 69 is over land.

There are now nine radio-telegraph stations installed.

81. The working of circuits with Baudôt apparatus has been extended on Baudôt Apparatus several main routes and continues to give satisfaction. An interesting develop- ment is the working of Baudôt apparatus between Calcutta and Bombay through an ordinary Morse duplex repeater at Nagpur.

82. The Murray system which was installed for work between Calcutta and Murray Apparatus. Bombay has not been found suitable to the traffic conditions and has been removed.

83. During the year, Calcutta, Madras and Rangoon have worked experi- Long distance mentally by Wheatstone to London via Karachi and the Indo-European Telegraph telegraphy. Company's lines. This is a very notable achievement in telegraph history, the distance being about 8,700 miles. The speed of working attained was 35 words a minute.

### STORES AND WORKSHOPS.

84. The store depôts at Bombay, Calcutta, Karachi, Madras and Rangoon Store Branch. imported and exported 940,273 packages in all as compared with 660,962 in the previous year. This increase is due to the transfer of considerable quantities of stores from the Alipore Storeyard to the other depôts with a view to clearing the yard and to make the smaller depôts self-contained as far as possible. A very small quantity of stores, effecting a saving of Rs. 800 only, were carried between depôts by Government steamers during the trooping season, as the Director of Marine could not spare any more space. Unserviceable stores in depôts and agencies were sold and Rs. 12,385 realised thereby.

85. The value of the outturn in the workshops during the year was Rs. Workshops. 11,27,000 as against Rs. 11,19,400 last year. The cost of manufacture of articles most in demand compares very favourably with the rates of the previous year, and in one item, the manufacture of E tubes, which were undertaken in the workshops for the first time, a saving of nearly Rs. 16,000 was effected.

The total value of the outturn is made up of stores 73'55 per cent; labour 17'97 per cent; general charges including salaries, interest on cost of buildings and plant, and all charges which cannot definitely be charged to any particular work, 7'67 per cent; machine rent including cost of electric power, '81 per cent.

### PERSONAL.

86. With the approval of the Government of India, Mr. M. G. Simpson, the Electrician, was placed on special duty in England for 6 months to study the

latest developments in radio-telegraphy, the working of up-to-date high-speed telegraphic and telephonic apparatus and the technical administration of the British Telegraphs. A valuable report was submitted by Mr. Simpson and his services were acknowledged by the Government of India. Mr. McNeil, Assistant Superintendent, who was at home at the time, assisted Mr. Simpson by submitting a useful note on oil engines.

87. Mr. R. T. Gibbs, Superintendent, was also placed on special duty in England and submitted a very useful report on the Pneumatic Tube installations in the British Post Office.

88. The work in the Traffic Branch of my office has been exceptionally heavy during the past year, and I wish to bring the services of Mr. H. T. Pinhey, Director of Traffic, prominently to notice. Mr. Pinhey was ably assisted by Mr. S. W. Bunyan, Deputy Superintendent, attached to his office.

89. The good work performed by the Officers and Traffic staff of the Department in giving effect to the various Traffic reforms that have been introduced, have been acknowledged by the Honourable Mr. W. L. Harvey, Member for the Department of Commerce and Industry, in his speech in Council on the 29th March 1909. In this respect, the excellent work performed by Messrs. N. U. K. Leslie, W. P. Henderson, I. C. Thomas and W. Sutherland, Superintendents in charge of the Bombay, Calcutta, Madras and Agra offices, respectively, deserves to be brought to notice specially.

90. In connection with the extensive reconstruction of the India-Burma lines, mentioned in paragraph 70 of this report, Mr. E. A. Kenyon, Deputy Director, Construction, rendered excellent service by making a personal inspection of the lines before the estimates were sanctioned. It was unfortunate that his health broke down under the strain of arduous marches through difficult country after he had completed the inspection of the Arakan route, and he was invalided home. His inspection enabled considerable economies to be effected in the estimates which had been submitted by the local officers.

91. The preliminary arrangements for the Field Telegraph operations in connection with the Mohmand Expedition were ably conducted by Mr. J. M. Coode, Superintendent of the North-West Frontier and Kashmir Division. When the advance was made, Mr. E. L. Bagshawe, Assistant Superintendent, took charge of the Field Telegraphs assisted by Mr. A. P. Manning, Assistant Superintendent. The entire Departmental Staff, Officers and Subordinates worked well and were specially commended by Sir James Willcocks, K.C.M.G., in command of the Mohmand Field Force.

92. The year has been a period of great pressure of work at my headquarters and I wish to bring to notice the services of Mr. R. Meredith, my Personal Assistant, who has been untiring and who has given me very valuable assistance.

SIMLA;

*The 30th September 1909.*

T. D. BERRINGTON,

*Director General of Telegraphs.*

OF PAID TELEGRAMS, THE WORKING EXPENSES, AND THE AVERAGE  
VALUE OF A TELEGRAM (REFERRED TO IN PARA 6)

EXECUTION OF DEEDS, CONTRACTS AND OTHER INSTRUMENTS ON BEHALF OF  
HIS MAJESTY'S SECRETARY OF STATE FOR INDIA IN THE CASE OF THE ARMY  
DEPARTMENT.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

JUDICIAL.

NOS. 1400—1419.

*Simla, the 6th October 1909.*

RESOLUTION.

In exercise of the powers conferred by Section 2 of the East India Contracts Act, 1870 (33 and 34 Vict., C. 59), and of all other powers enabling him in this behalf, the Governor General in Council is pleased to direct that the following be substituted for Part B of the Resolution of the Government of India in this Department no. 3-<sup>Judicial</sup><sub>485-501</sub>, dated the 28th March 1895, as amended by the resolutions noted on the margin relating to the execution of deeds, contracts and other instruments on behalf of His Majesty's Secretary of State for India in Council.

No. <sup>1-Judicial</sup><sub>14-30</sub>, dated the 8th January 1897.

No. 1597-1608 (Judicial), dated the 10th November 1899.

No. 1611-1627 (Judicial), dated the 4th December 1901.

No. 908-24 (Judicial), dated the 20th May 1903.

No. 1137-1154 (Judicial), dated the 27th July 1905.

B.—In the case of the Army Department—

I.—In the Military Works Services (subject to any limits fixed by the Government of India)—

1. All instruments relating to purchase, supply and conveyance or carriage of materials, stores, machinery, etc.

2. All instruments relating to the execution of works of all kinds, connected with buildings, bridges, roads, canals, tanks, reservoirs, docks and harbours, and embankments and also instruments relating to the construction of water works, sewage works, and the erection of machinery.

3. Security bonds for the due performance and completion of works.

4. Security bonds for the due performance of their duties by Government servants whom the officers specified have power to appoint.

5. Leases for grazing cattle on canal banks or roadsides; for fishing in a canal; for the cultivation of land; leases of water for irrigation and other purposes, and leases of water power; and instruments relating to the sale of grass, trees or other produce on roadsides or in plantations.

By the Director-General of Military Works,  
Commanding Royal Engineers, Assistant  
Commanding Royal Engineers and Garrison Engineers.

6. Leases of houses, land or other immoveable property, provided that the rent reserved shall not exceed Rs. 5,000 a month.

7. All instruments connected with the reconveyance of property given as security.

8. Instruments connected with the collection or farming of tolls at bridges or ferries or other means of communication provided by the local Government.

9. Agreements for the recovery of fines on account of drift wood or other timber passing into a canal.

10. Agreements with temporary establishments.

By the Director-General of Military Works, Commanding Royal Engineers, Assistant Commanding Royal Engineers and Garrison Engineers.

11. Agreements entered into in India with civilian mechanics and others for a specified period of service in the Military Works Services.

By the Director-General of Military Works.

12. All deeds and instruments relating to any matters other than those specified in heads 1 to 11.

By a Secretary to the Government of India or a Secretary to a local Government.

II.—Contracts and other instruments for the Ordnance Department as detailed below :—

1. Contracts for stores obtained in India for supplies to arsenals, depôts or factories.

2. Contracts for undertaking sales of unserviceable stores.

3. Agreements entered into in India with civilian employés for a specified period of service in ordnance establishments.

4. Contracts for landing, weighing, and forwarding ordnance stores.

By the Director-General of Ordnance in India, Inspector-General of Ordnance Factories in India and Inspectors-General of Ordnance.

5. All instruments connected with the reconveyance of property given as security.

By the Director-General of Ordnance in India, Inspector-General of Ordnance Factories in India, Inspectors-General of Ordnance, Ordnance officers in charge of arsenals and depôts, Proof Officer, and Superintendents of Factories.

III.—Contracts for the Supply and Transport Corps as detailed below :—

1. Contracts for supplies and services to and purchases from the Supply and Transport Corps.

By the Secretary to the Government of India, Army Department, Quarter Master General in India, General Officers Commanding Divisions and Brigades, Colonels on the Staff Commanding Brigades, Officers Commanding Stations and the Supply and Transport officer on special duty in Kashmir.

2. All instruments connected with the reconveyance of property given as security.

By the Secretary to the Government of India, Army Department, Quarter Master General in India, General Officers Commanding Divisions and Brigades, Colonels on the Staff Commanding Brigades, Officers Commanding Stations and Supply and Transport officer on special duty in Kashmir.

3. Agreements entered into in India with civilian employes for a specified period of service in the Supply and Transport Corps.

By the Quartermaster-General in India, General Officers Commanding Divisions and Independent Brigades.

IV.—Contracts for the Army Clothing Department as detailed below :—

1. Contracts for the supply of important articles of local manufacture.

2. Contracts for the supply of colours and standards.

3. Agreements entered into in India with civilian employes for a specified period of service in the Army Clothing Department.

By the Director of Army Clothing.

4. Contracts for making clothing either inside or outside factories. { By Superintendents of Army Clothing Factories, subject to the approval of the Director of Army Clothing.

5. Contracts for the supply of embroidered badges and unimportant articles of local manufacture and miscellaneous stores required for factory purposes.

6. Contracts for undertaking the sale of stores and materials and for the purchase from factories of cuttings and sweepings of textiles wasted in manufacture.

7. Contracts for the supply of carts.

By Superintendents of Army Clothing Factories.

8. Contracts for unimportant articles of foot gear and for undertaking the sale of stores and materials.

By the Government Inspector, Army Boot Factory, Cawnpore.

V.—Contracts for the Medical Department as detailed below :—

1. All contracts for supplies and services to and purchases from the Medical Store Department.

By the Director-General, Indian Medical Service.

2. All instruments connected with the reconveyance of property given as security.

By Medical Store-keepers to Government.

3. Agreements with passed candidates for the Indian Subordinate Medical Department.

4. Security bonds on behalf of native military medical pupils.

By Principals of Medical Colleges and Schools.

VI.—Contracts and other instruments for the Army Remount Department, as detailed below :—

1. Agreements with shippers for landing horses at the Presidency Remount Depot, Calcutta.

By the Quarter Master General in India, or Superintendent, Remount Department, Calcutta.

2. Contracts for undertaking the sale of rejected Government animals.

By the Quarter Master General in India.

3. Contracts for the occupation of land.

4. Contracts for grain, fodder, or stores.

By Superintendents of Remount Depôts and Circles with the approval of the Quarter Master General in India.

5. All instruments connected with the reconveyance of property given as security.

By the Quarter Master General in India and Superintendents of Remount Depôts and Circles.

6. Contracts for petty works at Remount Depôts and Circles.

By Superintendents of Remount Depôts and Circles.

VII.—Contracts and other instruments for the Farms Department as detailed below :—

Leases of land required for cultivation, grazing or other purposes by the Farms Department and instruments relating to other rights on lands under grass cultivation.

By an officer of the Farms Department.

VIII.—In the Military Accounts Department—

SUPPLEMENT TO  
**The Gazette of India.**

No. 43,} SIMLA, SATURDAY, OCTOBER 23, 1909.

**OFFICIAL PAPERS**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**GOVERNMENT OF INDIA.**

**DEPARTMENT OF REVENUE AND AGRICULTURE.**

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 21st October 1909, based on the Indian Daily Weather Reports of the period.**

The most important feature in the weather was the storm, which entered the Andaman sea from the east on the 14th. It moved in a northwesterly direction up to the 16th when it was central about 250 miles to the southwest of Kyaukpyu. Its course after that became more northerly and it crossed the Bengal coast to the east of Saugor Island on the evening of the 17th. It was central near Bogra on the morning of the 18th and then rapidly filled up, very little trace of it being shown in the charts of the 19th. The storm gave only light rain in Burma, but caused very heavy rain in parts of Eastern Bengal.

Weather was disturbed in Kashmir at the beginning of the week and light falls of rain and snow occurred in the extreme north. Rain fell on most days of the week in the south of the peninsula.

*Burma.*—A number of observatories reported rain on the 16th and 17th as the storm in the Bay was passing northwards along the coast, but on the

remaining days there was very little rain. Cloud was light to moderate and temperature was nearly normal.

*Northeast India, including Orissa.*—Heavy rain was given by the storm from the Bay in Eastern Bengal and the south of Assam: the week was practically rainless in Orissa, Chota Nagpur and Bihar. Skies were clear or only lightly clouded before and after the storm. Temperature fell considerably below normal in the area of heavy rain and was approximately normal elsewhere.

*The United Provinces, Central India and the Central Provinces.*—No rain fell except at the beginning of the week when a few light showers occurred in the northwest of the United Provinces. Skies were clear and from the 19th night temperature was in general defect.

*Northwest India.*—Light precipitation occurred locally at the beginning of the week in the western Himalayas and skies were heavily clouded there as long as the disturbance lasted. They were practically cloudless in the rest of the division. Maximum temperature was in defect in Kashmir, the Punjab, the North-West Frontier Province and Baluchistan.

*The Peninsula.*—Rain fell at most stations in Malabar, southeast Madras and Mysore. Cloud was moderate to heavy in the south: elsewhere skies were clear or only lightly to moderately clouded. Temperature at night was in defect in Hyderabad.

The following summarises the chief rainfall amounts as recorded at 8 hrs. each day:—

October 15th. Cuddalore 1'50", Pamban 1'79" and Mercara 1'50".

" 16th. Port Blair 5'04", Slipper Island 2'88" and Diamond Island 1'86".

" 17th. Akyab 1'85", Cochin 2'30" and Salem 2'31".

" 18th. Akyab 2'99", Chittagong 5'54", Narayanganj 3'34", Mymensingh 2'10", Bogra 3'88", Calcutta 3'21" and Jessore 12'07".

" 19th. Gauhati 1'98", Dhubri 2'25", Shillong 5'00", Cherra Poonjee 11'90", Chittagong 1'80", Dinajpur 2'00" and Pamban 1'62".

" 20th. Madura 5'07".

The rainfall of the week was above the average in the Bay Islands, Bengal proper, Eastern Bengal, Kashmir and southeast Madras, but it has made no important change in the departures from normal of seasonal rainfall. The rainfall of the period from the 30th April to the 21st October is 20 per cent or more in defect in Central India, the Central Provinces and Baluchistan; and 20 per cent or more in excess in Bengal proper, Rajputana, the east and north Punjab, the North-West Frontier Province and southeast Madras.

Secretary to the Government of India.

SIMLA;  
The 21st October 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
16th October 1909.

**Burma.**—Moderate rain has fallen almost everywhere. Transplanting of winter rice has been practically completed. Reaping of hill side rice and of autumn rice in the plains is progressing. Reaping of autumn sesamum and sowing of winter sesamum is approaching completion. Cultivation of miscellaneous, winter, island and other crops is advancing satisfactorily. Plucking of cotton and gathering of groundnuts have commenced in parts. More rain is required in parts of Prome. In Mandalay, the recent heavy rain did considerable damage in the Shwetachaung tract and floods destroyed 1,500 acres under rice. The condition of standing crops and prospects of the harvests are, on the whole, favourable. The price of unhusked rice has fallen largely at one centre, and slightly at five centres; it has risen slightly at one centre.

**Eastern Bengal and Assam.**—The weather during the week was stormy. Rain fell during the latter part of the week in the Dacca and Chittagong divisions and in the districts of Ra shahi, Rangpur, Bogra, Malda, Goalpara and the Khasi and Jaintia Hills. The heaviest rainfall occurred in Chittagong. The fall was deficient in parts of the Rajshahi division, the Surma Valley, Upper Assam and the hills. Damage to crops by storms is reported from Faridpur, Noakhali and the Chittagong Hill Tracts. Prospects of sugarcane, tea and winter rice are good; but cotton does not promise well. Ploughing for mustard, tobacco and other spring crops are in progress. Harvesting of jute is practically finished, but steeping still continues. The average price of common rice is almost stationary. Cattle disease is prevalent in four districts. Reports have not been received from Bakarganj, Pabna and the Garo hills.

**Bengal.**—The weather was seasonable at the beginning of the week but towards the latter part it became cyclonic in Lower Bengal and owing to this reports have not been received from all districts. From Nadia, Murshidabad, Jessore and Khulna, no reports have been received up to now but from the information received up to the present it appears that in Lower Bengal the rainfall has been general and in the rest of the Province a few scattered showers have been received. Harvesting of autumn crops is nearing completion. Winter paddy and sugarcane, two of the most important crops of this Province, are thriving but more rain is wanted for winter paddy on high lands in some districts in Bihar and Orissa. The price of common rice has risen in the 24-Parganas, Gaya, Saran and Champaran and has fallen in Bankura, Hooghly, Shahabad, Muzaffarpur, Bhagalpur, Purnea, Balasore, Sambalpur, Palamau and Singhbhum. Cattle disease is reported from several districts. The fodder and water supply is sufficient throughout the Province.

**United Provinces.**—No rain fell during the week except showers in several north-western districts. Harvesting of autumn crops, sowing of spring crops and preparation of fields for spring sowings continue. The condition of standing crops is good. More rain is required for late rice in Farrukhabad, parts of Oudh and some eastern districts. *Juar* has been damaged by insects in several districts. The condition of agricultural stock is generally good. Cattle disease is decreasing but is still reported from twenty districts. Markets are well stocked. Prices are generally stationary but have fallen in fourteen districts. Wheat and gram have risen slightly at Cawnpore.

**Punjab.**—Light to moderate rain was received in the Delhi division and the Rawalpindi district and light rain in parts of Jullundur, Sialkot and Shahpur. Rain is badly wanted in Mianwali. The condition of crops is generally good to average except in parts of the Mianwali district where the crops are in poor condition. Harvesting of autumn crops, such as bulrush millet, great millet, rice, maize, etc., continues. Cotton is being

picked in several districts. Crops are being damaged by insects in Ambala and Lahore and by rats in Ferozepore. Strong westerly winds have damaged pulses and great millet to some extent in Gurgaon and locusts are injuring crops in parts of Mianwali. Ploughings for, and sowings of, spring crops continue satisfactorily. Prices are generally unchanged. A slight downward tendency is, however, perceptible in several districts. Cattle are generally in good to average condition. Fodder is sufficient except in parts of Mianwali. Complaints of a short water supply still continue to be received from the Samundri tahsil of the Lyallpur district.

**North-West Frontier Province.**—Slight showers fell in the Peshawar, Kohat and Bannu districts. More rain is wanted in Peshawar. The condition of standing crops is generally average throughout the Province. *Bajra*, *juar* and rice crops in the Dera Ismail Khan district have been damaged by insects. In the Bannu tahsil, insects are still reported to have attacked sugarcane. Sowings of spring crops are in progress. Harvesting of *juar* and *bajra* have commenced in the Marwat tahsil of the Bannu district and the outturn is reported to be average. The water supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil in the Bannu district. The Paharpur canal in the Dera Ismail Khan district is still closed. Cattle are generally in good condition except that disease is said to be prevalent in one village of the Mardan tahsil in the Peshawar district. The health of the people is generally good throughout the Province except that malarial fever is prevailing in some parts of the Peshawar district. Prices of food-grains are fluctuating. Prices:—wheat 11 to 12½; gram 14½ to 17½; maize 18½ to 18¾; *bajra* 13 to 17½; and barley 20½ seers per rupee.

**Jammu.**—No rain fell during the week. Prices are fluctuating. Wheat sells from 11 to 16 and maize from 13 to 24 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type is prevalent in several tahsils. Fodder is sufficient.

**Kashmir.**—The weather was bright during the week except for two days' slight rain. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

**Rajputana.**—Standing crops and prospects are good. Harvesting of autumn crops and ploughing and sowing of land for spring crops are in progress. Crops have been damaged by grasshoppers, and cattle disease is reported, in places in Mewar. Fodder is sufficient. Prices are practically steady or falling throughout.

**Central India.**—The rainfall was partial in Bhopawar and *nil* elsewhere. Sowing of spring crops are in progress. Crops have been damaged slightly in parts of Bhopal, Bundelkhand and Bhopawar. Agricultural stock are satisfactory except for some cattle disease in parts of Indore, Bhopal, Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Malwa and are stationary but high elsewhere.

**Central Provinces.**—No rain fell during the week and the weather was clear. The nights and mornings are cool. Reaping of autumn and sowing of spring crops are in full swing throughout the Provinces. Picking of cotton began in parts of Nimar, Amraoti, Buldana and Yeotmal. *Juar* in the Sironcha tahsil of the Chanda district was damaged in places by grasshoppers and the crop was resown where necessary. Damage to cotton by worms is reported from Amraoti. Standing crops are in good condition but rain is required in the rice districts. Fodder and water are sufficient. Agricultural stock are in good condition. Prices:—wheat in Mandla, rice in Bhandara, Drug and Raipur and *juar* in Akola fell by ½ to 1 seer per rupee. Gram fell by 1½ seers in Chanda. Elsewhere, prices remained stationary or fluctuated slightly exhibiting a tendency to fall.

**Fendatory States.**—No rain fell during the week. Rain is needed in Kawardha, Khairagarh, Raj-Nandgaon and Bastar. Rice has suffered heavily in Kawardha and to a certain extent in Khairagarh. Otherwise, prospects are favourable. Picking of cotton has begun in Sarangarh. Harvesting of rice and *kodon* and sowing of spring crops are in progress. Fodder and water are adequate. Prices:—wheat and *kodon* in Raj-Nandgaon and wheat in Bastar rose by 1 seer per rupee. Wheat in Sarangarh and rice in Sakti fell by 1 seer and rice in Raigarh by 2 seers.

**Bombay.**—Moderate rain fell during the week in Kanara, Belgaum, Savantvadi and Kolhapur and slight rain in parts of the Konkan, Poona, Satara, the Karnatak and

Kathiawar. Rain is needed in parts of Karachi, Kanara, the Deccan and Dharwar. Standing crops are suffering from insufficient moisture in the Upper Sind Frontier and Poona. They have been damaged slightly by rats in Karachi and Hyderabad; by insects in Larkana, Hyderabad, Nasik, Ahmednagar, Poona, the Karnatak and Kolhapur; and are generally good elsewhere. The autumn harvest is progressing generally. Lands are being prepared for spring crops in parts of Sind, Gujarat, Khandesh, Nasik, Poona, Palanpur and Mahi Kantha. Sowing of spring crops is general. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and are generally in good condition. Drinking water is generally adequate. Irrigation water is deficient in the Upper Sind Frontier and Nasik. Grain stocks are sufficient. Prices have fallen in Sholapur, Satara and Bijapur and are stationary elsewhere. The quantity purchasable per rupee is in Sind 3 to 35 per cent; in Gujarat 7 to 24 per cent; in the Konkan 2 to 32 per cent; and in the Karnatak 2 to 24 per cent less than the normal. In the Deccan the quantity purchasable per rupee ranges from 22 per cent more than the normal to 13 per cent less.

**Hyderabad.**—Hardly any rain fell during the week, except in the Raichur and Bidar districts where the average comes to 6 and 3 cents respectively. The autumn crop is generally fair to good but is reported to be suffering for want of rain in parts of the Warangal division and in some isolated tracts where rain is urgently required. The crop is being harvested in most parts. Early rice is being weeded in some talukas. The crop is generally fair to good but needs more rain in the Warangal division and the Nizamabad district and has been damaged to some extent by insects in parts of the Medak and Nalgonda districts, especially in the former. Spring crops are still being sown in most parts but operations have been suspended for want of rain in the Warangal taluka. More rain is needed for purposes of the spring crop throughout the Telingana especially. In the Warangal division a few showers would greatly improve matters. Cattle disease prevails in eight talukas. Prices:—wheat 6½; coarse rice 7½; and *juar* 15½ seers per rupee. White *juar* is selling in Hyderabad City at 13 seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers each in the Adilabad and Chinnur talukas and the lowest 30 seers in the Owsa taluka of the Usmanabad district and the Nilanga taluka of the Bidar district.

**Mysore.**—The rainfall during the week was good in Bangalore, Tumkur, Mysore, Hassan, Kadur and Chittaldroog and fair elsewhere. Prices of food grains are generally steady. Standing crops are in good condition. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 2 inches 91 cents. Picking of cardamom continues. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient. Cattle disease prevails in parts.

**Madras.**—The rainfall was good in Coimbatore, Salem, the Nilgiris, Madura, Tinnevely, Malabar, South Canara, Trichinopoly and South Arcot; nil in Ganjam, Vizagapatam and Kurnool; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Anantapur, Nellore, Madura and Tinnevely. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Ganjam are withering, some in parts of Guntur, Bellary, Tanjore and Madura require more rain and some in parts of Cuddapah are diseased. Harvests continue in parts with outturn mostly fair to normal. Pasture is sufficient except in parts of Bellary, Nellore and Tinnevely. Fodder is scanty in parts of Godavari, Bellary and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in nine districts; has fallen in nine; and has risen in five. The prices of millets have fluctuated as follows:—*Ragi* is stationary in six districts; has fallen in twelve; and has risen in three. *Cholam* is stationary in five districts; has fallen in eight; and has risen in one. *Cumbu* is stationary in five districts; has fallen in nine; and has risen in one. The public health is generally good. Prospects are generally good. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

R. W. CARLYLE,

Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

No. 44.}

SIMLA, SATURDAY, OCTOBER 30, 1909.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**GOVERNMENT OF INDIA.**

**DEPARTMENT OF REVENUE AND AGRICULTURE.**

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 28th October 1909, based on the Indian Daily Weather Reports of the period.**

Another storm appeared in the Andaman sea on the 22nd and moving across the Bay struck Gopalpur on the evening of the 26th. The rainfall given by it was comparatively insignificant in amount and occurred chiefly in the Bay Islands and Burma. The storm caused some rain in Orissa, and heavy rain probably occurred in the neighbourhood of Gopalpur; but, owing to the storm, telegraphic communication was interrupted with that station and no information has as yet been received.

A few falls of rain were reported from the southeast of the Central Provinces and the extreme south of the peninsula and in Kashmir light precipitation occurred.

The rainfall of the week was above the average in the Bay Islands, Burma and Orissa.

*Burma.*—Rainfall was most general on the 25th; on the remaining days it occurred chiefly on the south Burma coast. Skies were moderately clouded. Temperature was approximately normal.

*Northeast India, including Orissa.*—A few falls of rain occurred in the coast districts. The storm in the Bay caused cloud to spread over the greater part of the division, from the 25th to 27th, but before and after these dates skies were nearly cloudless. Night temperature was in defect in the western districts during the first part of the week, but as cloud increased night temperature rose and at the close of the week it was in excess at several observatories.

*The United Provinces, Central India and the Central Provinces.*—Rain fell at Nagpur and Raipur. Skies were practically cloudless up to the 26th when, in consequence of the storm, cloud spread over the Central Provinces and the east of Central India. The minimum temperatures reported on the first three days of the week were in defect almost throughout the division.

*Northwest India.*—There were a few light falls of rain and snow in Kashmir, and skies were cloudy there up to the 26th, but in other parts of the division skies were almost free from cloud. Temperature was normal or in excess.

*The Peninsula.*—There have been only a few falls of rain, chiefly in the extreme south. Skies were clear or lightly to moderately clouded. Temperature was in excess in the day time in parts of Madras and in defect at night in the Deccan.

The following summarises the chief rainfall amounts of the week as reported at 8 hrs. each day:—

October 22nd. Port Blair 2·62" and Pamban 1·61".

„ 23rd. Slipper Island 3·56", Tavoy 1·59" and Pamban 1·57".

„ 24th. Slipper Island 2·25", Diamond Island 2·13" and Trivandrum 2·27".

„ 25th. Minbu 2·07", Monywa 1·34", Trivandrum 4·85" and Tinnevely 1·71".

„ 27th. False Point 1·45".

The seasonal rainfall (from 30th April to date) is 20 per cent or more in excess in Bengal proper, Rajputana, the east and north Punjab, the North-West Frontier Province and southeast Madras; and 20 per cent or more in defect in the Central Provinces, Central India and Baluchistan. The only important change introduced by last week's rainfall is a considerable decrease in the excess shown a week ago in southeast Madras.

Division.	RAINFALL DATA FOR WEEK ENDING ON 28TH OCTOBER 1909.			RAINFALL DATA FROM 30TH APRIL 1909 TO 28TH OCTOBER 1909.			SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.

R. W. CARLYLE,  
Secretary to the Government of India.

SIMLA;  
The 28th October 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
23rd October 1909.

**Burma.**—The rainfall during the week was general but mostly light. Transplanting of winter rice has been practically completed. Reaping of autumn rice on hill sides and in the plains continues. Reaping of autumn sesamum and sowing of winter sesamum are nearly finished. Cultivation of miscellaneous winter crops is progressing. Standing crops are generally in good condition and prospects are favourable. The price of unhusked rice has fallen slightly at three centres and in two other cases changes are unimportant.

**Eastern Bengal and Assam.**—The weather during the week was seasonable. Slight to moderate rain fell in all districts. Damage to crops by the recent cyclone was slight in most places. Prospects of tea, winter rice and pulses are good but cotton and lac have suffered some damage from the recent storm in the hills. Ploughing for mustard, tobacco and other spring crops is in progress. Steeping and washing of jute are almost finished. The average price of common rice has fallen by about one per cent. Cattle disease is reported from Dinajpur and Kamrup.

**Bengal.**—During the week light showers of rain fell in Lower Bengal and in Purnea, Darjeeling, the Sonthal Parganas, Balasore, Puri, Singhbhum and Cooch Behar. These showers were preceded by heavy cyclonic weather which did damage to all crops in Nadia, Murshidabad, Jessore and Khulna. Much damage was also done to winter paddy and to other standing crops in the region where the cyclone travelled. Unfavourable reports as to the present state of crops have been received from Murshidabad, Nadia, Jessore and Hooghly. There has been loss of life of both men and cattle in some places in Jessore and Khulna. The prospects of the winter paddy crop for the Province as a whole are anticipated at present to be satisfactory but much depends upon the rainfall which may be received in the very near future. District returns show that more rain is wanted especially on upland soils in Bankura, Shahabad, Saran, Bhagalpur, Balasore, Angul, Puri and Palamau. The rain up to the present has been beneficial for the continuation of sowings of spring crops in many districts. It is reported that the price of common rice has risen in six districts, *viz.*, Burdwan, Jessore, Khulna, Shahabad, Saran and Angul, and has fallen in Patna, Champaran and Hazaribagh. Cattle disease prevails in many districts. The fodder and water supply is sufficient throughout the Province.

**United Provinces.**—No rain fell during the week. Harvesting of autumn crops and sowing of spring crops continue. Late rice is being irrigated where necessary. The rainfall has been insufficient for late rice in a few districts and insects have done some injury to *juar*. Otherwise, standing crops are flourishing. The outturn of harvested crops is good. The condition of agricultural stock is generally good but cattle disease is reported from twenty districts. Markets are well supplied. Fodder is plentiful. Prices have fallen in fourteen districts.

**Punjab.**—Slight rain fell in parts of Hissar and Sialkot. The condition of standing crops is generally good to average except in parts of the Mianwali district where the crops are suffering from prolonged drought. Standing crops on unirrigated areas are below average in Rohtak and parts of Shahpur. Harvesting of autumn crops, such as bulrush millet, great millet, rice, maize, etc., and picking of cotton continue and the outturn is generally good to average. The outturn of cotton is below average in Ludhiana and parts of Lyallpur. Crops are being damaged by insects in parts of Ambala and Amritsar and by rats in Ferozepore, Lahore and Sialkot. Sowings of spring crops continue satisfactorily. Prices are generally unchanged but there is a slight downward tendency in some districts. Cattle are generally in good to average condition. Fodder is

sufficient except in parts of Shahpur and Mianwali. The supply of fodder is diminishing rapidly in Jhang. Complaints of a short water-supply still continue to be received from the Samundri tahsil of the Lyallpur district.

**North-West Frontier Province.**—No rain fell during the week except 2 cents in the Charsadda tahsil of the Peshawar district and 4 cents in the Hazara district. The condition of standing crops is generally average throughout the Province. In the Dera Ismail Khan district, rice, *juar* and *bajra* crops have been damaged by insects. Sowings of spring crops are in progress. Sowings of gram have been finished in the Marwat tahsil of the Bannu district. Harvesting of autumn crops has commenced in the Bannu district and the outturn is reported to be average. In the Dera Ismail Khan district, harvesting of rice and cotton has also commenced. The water-supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil in the Bannu district. There has been no irrigation from the Paharpur canal in the Dera Ismail Khan district. The condition of cattle is generally good throughout the Province. The health of people is generally good except that malarial fever is reported in some parts of the Peshawar district and in the Bannu tahsil. Prices are falling. Prices:—wheat  $11\frac{1}{8}$  to 13; gram  $15\frac{1}{2}$  to 17; maize  $13\frac{1}{2}$  to  $19\frac{1}{2}$ ; *bajra*  $14\frac{1}{2}$  to  $19\frac{1}{2}$ ; and barley  $21\frac{1}{8}$  seers per rupee.

**Jammu.**—No rain fell during the week. Prices are stationary. Wheat sells from 10 to 16 and maize from 13 to 24 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type prevails in four tahsils of the Province. Fodder is sufficient.

**Kashmir.**—The weather was bright except for slight rain during the week which did good to spring crops but was not beneficial to the autumn crop as it impeded its harvesting. As a result of flood effects the condition of autumn crops was below average. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

**Rajputana.**—Showers of rain fell in places in Bikaner. Standing crops and prospects are good. Harvesting of autumn crops and ploughing and sowing of land for spring crops are in progress. Damage has been done to the autumn crop in places in Jaisalmer. Cattle disease prevails in places in Jaisalmer, Mewar and Dungarpur. Fodder is sufficient. Prices are rising in Bikaner, Mewar, Shahpura, Alwar, Karauli and Dholpur and are steady or falling elsewhere.

**Central India.**—There was no rain during the week. Harvesting of autumn crops and sowing of spring crops are in progress. Crops have been damaged slightly by insects in parts of Gwalior, Bhopal and Bhopawar. Agricultural stock are satisfactory except for some cattle disease in parts of Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly but are steady in Malwa, are fluctuating in Indore and are stationary but high elsewhere.

**Central Provinces.**—The weather has been clear and the nights and mornings cool. Harvesting of autumn crops, picking of cotton and sowing of spring crops are in progress. Germination of spring crops is reported to be satisfactory. Prospects are favourable. Showers would still be very beneficial in the rice-growing districts. Fodder and water are adequate. Cattle are doing well. Prices:—wheat remained stationary in twelve districts, gram in sixteen, rice in seventeen and *juar* in twenty-one districts. Wheat and gram in the Vindhyan districts and rice in Chanda fell by  $\frac{1}{2}$  to  $1\frac{1}{2}$  seers per rupee. Rice rose by 1 seer in Bilaspur and wheat by  $\frac{1}{2}$  seer in Mandla. *Juar* fell by 5 seers in Saugor.

**Feudatory States.**—Rice suffered slightly in parts of Raj-Nandgaon and Bastar for want of rain. A shower would be welcome in Chhuikhadan and Sirguja. Picking of cotton, harvesting of rice and *kodon* and sowing of spring crops continue. Standing crops are in good condition. Fodder and water are ample everywhere. Prices:—wheat rose by 1 seer per rupee in Sarangarh and rice by 2 seers in Korea.

**Bombay.**—Slight rain fell during the week in Kanara and Kolhapur. Rain is needed in parts of Karachi, Kanara and the Deccan. Standing crops are suffering from

insufficient moisture in the Upper Sind Frontier and Poona. They have been damaged slightly by rats in Hyderabad; by insects in Larkana, Hyderabad, Nasik, the Karnatak and Kolhapur; and are generally good elsewhere. The autumn harvest is progressing everywhere. Lands are being prepared for spring crops in parts of Sind, Gujarat and Mahi Kantha. Sowing of spring crops is general. Cotton picking is progressing in Hyderabad, Thar and Parkar, Khandesh and Ahmednagar. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and are generally in good condition. Drinking water is generally adequate. Irrigation water is deficient in the Upper Sind Frontier and Nasik. Grain stocks are sufficient. Prices have fallen in parts of Gujarat and the Deccan; have risen in Bijapur and Belgaum; and are stationary elsewhere. The quantity purchasable per rupee is in Sind 3 to 38 per cent; in the Konkan 2 to 32 per cent; and in the Karnatak 6 to 24 per cent less than the normal. In Gujarat the quantity purchasable per rupee ranges from 3 per cent more than the normal to 20 per cent less and in the Deccan from 15 per cent more than the normal to 13 per cent less.

**Hyderabad.**—No rain fell during the week. General prospects are fair to good. The autumn crop is good in places and is generally fair except in parts of the Raichur district and the Warangal division where more rain is required. Harvesting of the crop has begun in parts. The early rice crop is being weeded in a few talukas, especially in Telingana. The crop is generally fair to good but needs more rain or tank water in parts of the Warangal division and the Nizamabad district. Some damage has been done to crops by insects in parts of the Medak district. Harvesting of crops has practically begun. Sowings of spring crops still continue in most parts but operations have been suspended for want of rain in the Warangal and Hazarnagar talukas. More rain is wanted for purposes of the spring crop throughout Telingana, especially in the Warangal division. The crop has been damaged to some extent by insects in parts of the Nalgonda and Adilabad districts. Cattle disease prevails in eight talukas. Prices:—wheat 6½; coarse rice 7½, and *juar* 15½ seers per rupee. White *juar* sells in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers each in the Chinnur and Rajura talukas of the Adilabad district and the lowest 28 seers in the Nilanga, Rajura and Udgir talukas of the Bidar district.

**Mysore.**—The rainfall during the week was very slight in parts of Mysore, Hassan and Kadur and nil elsewhere. Prices of food grains are generally steady and markets are well supplied. Standing crops are in good condition but more rain is needed for dry crops in parts of Kolar and Tumkur. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—Rice is in good condition. Picking of cardamom continues and the outturn is estimated at 50 per cent. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall during the week was heavy in Malabar; good in Coimbatore, Madura, the Nilgiris, Salem, Tinnevely and South Canara; light to fair in Godavari, Kistna, Nellore, Chingleput, Tanjore, North Arcot, South Arcot and Trichinopoly; and nil elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Anantapur, Nellore, Chingleput and Tinnevely. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Ganjam, Vizagapatam, the Deccan, Nellore, Chingleput and Tanjore require more rain and some in parts of Guntur are withering. Harvests continue in parts with outturn mostly fair to normal. Pasture is sufficient except in parts of Bellary and Nellore. Fodder is scanty in Vizagapatam, Godavari, Bellary and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in ten districts: has fallen in nine; and has risen in four. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts; has fallen in nine; and has risen in four. *Cholam* is stationary in nine districts; has fallen in three; and has risen in two. *Cumbu* is stationary in five districts; has fallen in six; and has risen in four. The public health is generally good. Prospects are generally good. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

R. W. CARLYLE,  
Secretary to the Government of India.

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 45 }

CALCUTTA, SATURDAY, NOVEMBER 6, 1909.

**OFFICIAL PAPERS.**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

## GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

---

## RESOLUTION.

No. 8089-8090, dated Simla, the 27th October 1909.

---

REPORT ON THE WORKING OF THE POST OFFICE OF INDIA DURING THE YEAR  
1908-1909.

---

## READ—

The Report on the working of the Post Office of India during the year 1908-09.

---

ORDER.—Ordered that a copy of the Report be forwarded to the Finance Department for information.

Ordered, also, that the Report be published in the Supplement to the *Gazette of India*.B. ROBERTSON,  
Secretary to the Government of India.

---

ANNUAL REPORT  
ON  
THE POST OFFICE OF INDIA

FOR THE YEAR

1908-09.

No. 254 S.-B.P., dated the 12th October 1909.

From—C. STEWART-WILSON, Esq., I.C.S., Director-General of the Post Office of India,  
To—The Secretary to the Government of India, Department of Commerce and Industry.

I HAVE the honour to submit the Annual Report on the Post Office of India for the official year 1908-09.

2. The administration of the Department was in charge of Mr. W. Maxwell as officiating Director-General for nearly 9 months of the year under report and of Mr. E. A. Doran for over a month. I returned to India on the 29th January 1909 and the administration of the Department was in my hands for the last 2 months of the year.

3. Among the changes in the inland post which directly affected the public the most important were the following :—

(a) the scheme of reducing inland postage rates was completed by raising the maximum weight for which a registered newspaper can be carried for  $\frac{1}{2}$  anna from 6 tolas to 8 tolas, and for  $\frac{1}{2}$  anna from 20 tolas to 40 tolas ;

(b) the rules relating to the use of postcards in the inland post were revised and simplified. It was found that the grant from time to time of various concessions had so complicated the rules that they had become difficult to follow, with the result that a large proportion of postcards was being surcharged with postage to the annoyance of the public and to the grave inconvenience of the Post Office ;

(c) our value-payable procedure also was greatly simplified. In this respect India merely followed in the footsteps of other countries. For a few weeks it is true rather a severe call was made on the patience of the public while postal officials accustomed themselves to the new methods, but things are now working smoothly and much trouble is being saved both to the Post Office and the public ;

(d) the revenue money order system was extended during the year to the Bombay Presidency.

Charge of  
the Post  
Office.Principal  
events,  
inland post.

Further progress was also made in carrying out the far-reaching reforms in sorting, especially in the Railway Mail Service, which I have referred to in former reports as the work of Mr. C. C. Sheridan. The result has been most gratifying and further progress will be made in this respect during the current year. In such matters we have necessarily to go slowly and to introduce changes gradually.

Our field post offices in North China continued to be worked during the year, and the Department had the usual calls for special postal arrangements in connection with military camps, etc., and His Excellency the Viceroy's tours.

As usual much anxiety and hard work were caused by numerous breaches in various railway lines caused by floods. While plague was not so prevalent as in previous years (the Post Office lost 62 officials from this disease as compared with 243 in 1907-08), on the other hand the whole of Northern India was visited by an extraordinary epidemic of malarial fever which attacked almost every postal official more or less and made the carrying on of work extremely difficult. Many men had to continue at their work in spite of severe illness and men who had barely recovered had constantly to do the work of others who were quite incapacitated, as well as their own. It is gratifying to be able to report that I have heard of no case where the interests of the public were allowed to suffer in any way. Although the strain on postal officials was extremely severe, it was borne with cheerful fortitude and without complaint.

Increases in  
pay of  
postal  
servants

4. As in previous years the adequate payment of postal servants has been constantly borne in mind. Head postmasters had their pay very thoroughly revised in the years 1906-08, while in the year under report increases in pay were sanctioned in the case of 27 deputy and assistant postmasters, 375 sub-postmasters and 533 branch postmasters. The pay of 603 clerks and sorters, 1,490 postmen and village postmen, 1,127 runners and 508 other inferior servants was also raised.

During the last three years, besides substantial improvements in the grading of Superintendents, the following officials have had their pay increased :—

207	.	.	.	.	Postmasters.
134	.	.	.	.	Deputy and assistant postmasters.
1,446	.	.	.	.	Sub-postmasters.
2,090	.	.	.	.	Branch postmasters.
1,504	.	.	.	.	Clerks and sorters.
7,508	.	.	.	.	Postmen and village postmen.
3,931	.	.	.	.	Runners.
2,634	.	.	.	.	Other inferior servants.
19,454					

In other words, over 21 per cent. of our existing staff have had their pay raised and prospects improved (often very materially) in the last three years, and the process continues.

Principal  
events,  
foreign post.

5. The letter postage to the British Post Office Agencies in Morocco, the Friendly (or Tonga) Islands, the Gilbert Islands, and the British Solomon Islands was reduced to one anna per ounce.

The foreign money order system was extended to the Argentine Republic, Costa Rica, Curaçao, the Caroline Islands, the Marianne (or Ladrone) Islands (except Guam), the Marshall Islands, the Palaos (or Pelew) Islands, German New Guinea, North-Western Rhodesia, and the German Protectorates of Samoa

and Kiautschow. The maximum limit of amount for a single money order was raised to £40 in the case of an exchange with the Republic of Honduras.

A system was introduced with effect from the 1st May 1908, by which the remitters of money orders exchanged between India and the United Kingdom as well as a large number of foreign countries and colonies can obtain advices of the payment of their money orders from the foreign post offices of payment by paying a fee of two annas in addition to the commission chargeable on each such order.

The rates of postage and conditions applicable to parcels for the Argentine Republic, Guatemala, German South-West Africa, and the British post office at Beyrout were revised, and a revision was also effected in the rates of postage on parcels for the United States of America.

The foreign parcel post was extended to Abyssinia, the Russian offices in Northern Manchuria, and to Mauritania. Insurance to destination was made available for foreign parcels addressed to Northern Manchuria, Mauritania, and Jamaica, and for foreign registered letters addressed to the British Protectorate of Somaliland and to Dutch Guiana (Surinam).

Arrangements were made, in the case of uninsured parcels exchanged between India and the Somaliland Protectorate, for the payment under certain conditions of compensation not exceeding 25 francs (R15-0-0), in the event of loss of, damage to, or abstraction from such articles.

A supplementary contract, concluded with the British Indian Steam Navigation Company for the conveyance of mails weekly between Rangoon and Penang, came into operation on the 1st July 1908.

6. The Peninsular and Oriental Steam Navigation Company's outward steamers carrying the European mails were due to arrive at Bombay at 6 A.M. on Friday of each week. During the year under report, 52 weekly mails were received, arriving on 50 occasions on Friday, once on Saturday and once on Sunday. In the case of the Friday arrivals, the contract time was exceeded on seven occasions. The Saturday arrival was due partly to the detention of the steamer at Marseilles, owing to a dislocation in the Continental train service and partly to the vessel experiencing rough weather in the Mediterranean, while the arrival on Sunday was due to the late arrival of the connecting steamer, the "Himalaya," at Aden owing to an accidental breakage of her engine room machinery off Port Said. The shortest time occupied in the transit of the mail from London to Bombay was 13 days, 6 hours, and 45 minutes, while the average time for the year was 13 days, 10 hours, and 2 minutes. In the opposite direction, that is, from Bombay to London, the quickest transit was 12 days, 21 hours and 34 minutes, the average time for the year being 13 days, 12 hours, and 10 minutes.

Working of the P. and O. contract.

## Section I.—Post offices and postal communications.

### (1) Post offices and letter-boxes.

7. Appendix I shows the number of post offices, letter-boxes and village postmen in each circle at the close of the year, compared with those in existence at the close of the previous year. There was an increase during the year of 622 post offices and 1,929 letter-boxes. The increase in the number of post offices was greatest in the United Provinces and Eastern Bengal and Assam and the largest addition to the number of letter-boxes was in

Post office and letter-boxes.

Bengal. The number of post offices in charge of school masters and other persons not being regular servants of the Department rose from 11,387 to 11,918. It should be explained that the decrease in the number of village postmen is only nominal. It is due to improved delivery arrangements which allow of postmen returning to their offices daily. "Village postmen" are postmen who stay out on their beats for over a day at a time.

(2) Postal communications.

Postal communications.

8. In Appendix I are also shown the lengths of line over which mails were conveyed in each circle by the various agencies employed by this Department. Nearly all these lines were traversed daily in both directions, and many much more frequently. The total figures for the year under report and for the preceding year are given in the following statement :—

	NATURE OF POSTAL COMMUNICATIONS.				
	Railway.	Runners and boats.	Mail cart, tonga, etc.	Steamer.	TOTAL.
Mileage at close of 1907-08 . . . . .	30,536	95,372	9,379	19,051	154,338
" " 1908-09 . . . . .	31,528	96,299	9,723	19,083	156,633
Increase or decrease . . . . .	+992	+927	+344	+32	+2,295

Mails are carried over nearly half a million miles daily.

## Section II.—Correspondence and Parcels—Postage Stamps.

(1) Correspondence and Parcels.

Statistics of postal articles.

9. The estimated number of postal articles of all kinds, exclusive of money orders and parcels, issued for delivery during the year, added to the actual number of parcels, amounted to over 885 millions, or nearly 58½ millions in excess of the number during the preceding year. Statistics showing the different classes of articles delivered in the various postal circles during 1908-09 will be found in Appendix II, and a general summary of the results is given in the following statement :—

Classes of postal articles.	1907-08.	1908-09.	Increase (+) or decrease (—).	Percentage of increase (+) or decrease (—).
Letters paid . . . . .	305,034,801	336,767,723	+31,732,922	+10.40
" unpaid . . . . .	3,304,000	33,072,723	+29,768,723	+898.61
" registered . . . . .	17,633,252	18,708,647	+1,075,395	+6.10
Total letters . . . . .	360,072,953	393,549,163	+33,476,210	+9.28
Postcards . . . . .	362,516,626	383,746,244	+21,229,618	+5.85
Total letters and postcards . . . . .	723,519,579	777,295,077	+53,775,498	+7.43
Registered newspapers . . . . .	48,294,479	50,107,799	+1,813,320	+3.75
Book and pattern packets . . . . .	48,941,096	51,579,843	+2,638,747	+5.39

It will be seen that there was a large increase in the total number of articles issued for delivery under every head except that of unpaid letters as regards which a comparison of the figures with those of the previous year shows a very satisfactory and welcome decrease of '61 per cent. The numerical increase during 1908-09 was greater under the head of paid ordinary letters than under any other head of postal articles. This was to be expected, as the year under review was the first one in which the full effect of the greatly reduced letter postage rates was felt. The comparatively small increase in parcel traffic is no doubt due to the general depression in trade during the year.

The diagram opposite this page shows graphically the growth of postal traffic in its principal branches since 1854.

10. The second table in Appendix I shows, for each postal circle, the number of post offices, letter-boxes, and postal articles in relation to area, population, and literate population.

Average number of postal articles per head of population.

Altogether there were 3.13 postal articles—letters, postcards, packets, and parcels—per head of the total population and 55.55 postal articles per head of the literate population according to the last census. As in previous years, the number of postal articles per head of the total population was highest in Bombay where it was 6.34.

11. The foreign correspondence received in India for delivery is included in the total figures contained in Appendix II. The estimated number of letters and postcards received from the United Kingdom was about 11½ millions as compared with about 9 millions in the preceding year, while over 11½ millions of newspapers, book-packets, and samples were received as compared with about 9½ millions in the previous year. The estimated number of letters and postcards despatched to the United Kingdom from this country during 1908-09 was nearly 9 millions, as compared with about 7½ millions and the number of newspapers, book-packets, and samples was about 1½ millions, as compared with slightly over 1½ millions during 1907-08. Part of the abnormally large increase in the estimated number of letters and postcards received from the United Kingdom is probably due to a change in the method under which the weights of mails sent to this country are recorded, the British Post Office having now adopted for this purpose the Union System by which greater accuracy is believed to be secured.

Foreign correspondence.

As regards the correspondence exchanged with countries other than the United Kingdom, the figures for the year under report are based on the fresh statistics recorded in October 1908. The estimated number of letters and postcards received in India from such countries remained at slightly over 4 millions, while that of newspapers, book-packets, and samples received rose from 4 millions in 1907-08 to nearly 4½ millions in the year under report. The estimated numbers of (1) letters and postcards, and (2) newspapers, book-packets, and samples despatched to such countries were about 5 millions and over 2½ millions, respectively, in 1908-09 as compared with a little over 4½ millions and 2½ millions, respectively, in 1907-08.

12. The total number of parcels sent by the foreign post from this country was 267,569, as compared with 266,159\* during the previous year, and the number received was 354,114, as compared with 327,041\* in 1907-08. There was thus an increase of only .53 per cent. in the number of foreign parcels despatched against 8.28 per cent. in the number received.

Foreign parcels.

\* These are revised figures.

The numbers of parcels sent to, and received from, the United Kingdom during the year under report were 122,220 and 261,534, respectively, as compared with 125,457 and 239,021, respectively, during 1907-08. Although there was a decrease in the case of parcels despatched, the percentage which the traffic with the United Kingdom bears to the total of our foreign parcel traffic remains fairly stationary. In the case of the exchanges with countries other than the United Kingdom, the traffic improved in both directions, the numbers of parcels sent to, and received from these countries during the year being 143,781 and 92,059, respectively, as compared with 139,366\* and 87,477,\* respectively, in the previous year. In the direction from India the most important increases were in the despatches to Ceylon and France, while in the opposite direction, the greatest increases were in the receipts from Italy and France.

The numbers of parcels received at Bombay by the inward Christmas and New Year's mails were 9,821 and 10,173, respectively, as compared with 9,577 and 10,685, respectively, in the previous year.

Delivery  
work of the  
year.

13. Appendix II shows that the number of letters, postcards, newspapers, and packets issued for delivery and of parcels posted amounted to 885,123,868, and these figures, added to the 23,630,295 money orders issued for payment, make a grand total for all these classes of articles of 908,754,163, as compared with 849,469,688 in 1907-08, being an increase of 6.98 per cent. as against one of 6.06 per cent. in the previous year. Of these 908,754,163 articles, it is estimated that 905,985,951, or 99.69 per cent., were actually delivered or paid.

Work of  
Dead Letter  
Offices.

14. The total number of postal articles, excluding money orders, consigned to the Dead Letter Offices during the year under report was 9,199,633, representing an increase over the previous year of 8.96 per cent., as against one of 10.48 per cent. in 1907-08 and of 19.68 per cent. in the preceding year. This improvement is mainly owing to the revision of the regulations relating to postcards.

Detailed information showing the distribution among the Dead Letter Offices, and the manner of disposal, of the articles which reached them, is given in Appendix III. More than 33 per cent. of the articles received were redirected to the addressees, while more than 44 per cent. were issued for return to the senders. Less than 8 per cent. of the total number of articles issued by the Dead Letter Offices came back to them as undelivered, and the total number of articles finally deposited as "Dead", that is, as undeliverable either to addressees or senders, was 2,594,764. This represents 29 out of every ten thousand of the total number of articles given out at post offices for delivery, and includes a large number of articles which from their nature were not susceptible of delivery, such as articles with no address at all. In Bengal, Madras and Bombay alone about 120 articles were posted every day with no address whatever, and many of these contained money or valuables. One-third of the articles sent to the Bombay and Calcutta Dead Letter Offices bore quite incomplete addresses. In articles opened in the five larger Dead Letter Offices, cheques, hundies, currency notes, bills of exchange, coins, and other property, of the nominal value of more than 7 lakhs of rupees were found. The great majority of these articles were successfully delivered either to the addressees or the senders.

\* These are revised figures.

## (2) Postage stamps.

15. Details of the issues from treasuries of ordinary postage stamps, postcards, embossed envelopes, and wrappers and also of service postage stamps, postcards and envelopes will be found in Appendix IV. The total value of ordinary postage stamps and postal stationery issued during the year amounted to over 264 lakhs of rupees, showing an increase of more than 32 lakhs over the value of issues during the previous year. The total value of service stamps and stationery issued exceeded 43 lakhs, being an increase of more than  $5\frac{1}{2}$  lakhs upon the last year's figure.

The quarter-anna ordinary adhesive stamp continued to command the highest sale, the total number sold having increased from  $151\frac{1}{2}$  millions in the previous year to over 167 millions during the year under report. The quarter-anna single postcard had the next largest sale, but, owing to the still growing popularity of postcards of private manufacture the sales decreased from over 127 millions in 1907-08 to about  $119\frac{1}{2}$  millions. This is all to our advantage as the public pays only for the value of the stamp on the postcards. The half-anna adhesive stamp comes next, and its issues (including the stamps in booklets) were over 106 millions. This was followed by the small half-anna envelope, which is sold for the face value of the stamp, with a sale of over 70 millions as against  $73\frac{3}{4}$  millions in the previous year. In this as in the sales of most other classes of postal stationery there has been a decrease, which is probably attributable partly to the raising, from October 1907, of the unit weights allowed for letters under the  $\frac{1}{4}$ -anna and 1-anna rates of postage. This change admits of the use of a heavier and better class of stationery than formerly was the case and in consequence there has been a falling off in the demand for the light envelopes sold by the Post Office. Partly, also, there seems to be little doubt that the public has less fear of adhesive stamps on letters being stolen. The special envelopes and wrappers supplied by the Department for which a charge is made on account of stationery, showed a general decrease in the sales except in the case of the registration envelopes and the new half-anna square envelope. As regards service stamps and stationery there was a general increase in the sales except in the case of the quarter-anna postcard, the one-anna thick square envelope, and the one-anna stamp.

In addition to postage stamps, non-judicial and court-fee stamps are sold at many post offices; but, except in Burma, the postmaster acts as a private vendor in respect of these stamps, and they do not form part of the post office balance. In Burma, where general stamps are kept by postmasters in the same way as postage stamps, the sales amounted to R74,821.

With effect from the 1st April 1908 the use of postage stamps has been prescribed for the purpose of paying the charges on inland and foreign telegrams and the marked increase in the sales of both the ordinary and service postage stamps is no doubt chiefly due to the introduction of this measure. During the year ordinary postage stamps of the value of 10 rupees, 15 rupees and 25 rupees and service stamps of the value of 6 annas, 2 rupees, 5 rupees, 10 rupees, 15 rupees and 25 rupees were specially ordered for use in paying the charges on telegrams and, with the exception of the six-anna service stamp and the 25-rupee stamp, ordinary and service, which did not arrive in India before the close of the year, were put into circulation in January 1909.

In the Annual Report for 1895-96 it was reported that postage stamps overprinted with the words "Postal Service" had been introduced for the purpose of bringing to account sums collected as customs duty on articles received by the foreign post and delivered in India, and that no discount would be allowed on the sale of these stamps. Now that discount is no longer allowed on the sale of postage stamps, the necessity for a distinctive stamp has ceased to exist, and when the present stocks are exhausted, the use of these stamps will be discontinued.

### Section III.—Insurance and Value-payable Post.

#### (1) Insurance.

Insurance  
business.

16. During the year under report 956,189 letters and parcels were insured for transmission by post, the aggregate insured value being more than 23½ crores of rupees. The following statement shows the year's business, as compared with that of the preceding year:—

	Insured Letters.		Insured Parcels.		TOTAL.		
	Number.	Value.	Number.	Value.	Number.	Value.	Insurance fees.
1907-08	378,101	R 8,47,18,535	478,285	R 14,34,32,449	856,386	R 22,81,50,984	R 3,08,425
1908-09	455,715	9,77,80,817	500,474	13,51,64,305	956,189	23,29,45,122	3,10,046
Percentage of increase (+) or decrease (—)	+20.53	+15.42	+4.64	—5.76	+11.65	+2.10	+1.53

The average amount for which each letter was insured was R215, as compared with R224 in the preceding year, and the average amount for which each parcel was insured was R270, as compared with R299 in 1907-08.

Claims for  
compensation.

17. The number of claims for compensation in respect of insured articles was one hundred and eleven, as compared with eighty-seven in the previous year. Of these, fifty-three were admitted, the loss having been caused in forty-five cases by fraud or negligence on the part of postal servants, in six cases by accident, and in the remaining two cases by highway robbery. The total amount paid in satisfaction of these claims was R10,489-2-6, of which the sum of R2,552-3-6 was recovered, so that the actual loss to the Department was R7,936-15-0.

#### (2) Value-payable post.

Value-  
payable  
business.

18. The total number of value-payable articles of all kinds sent through the post was 6,393,575, as compared with 6,165,600 in the previous year. The total amount declared for recovery was nearly 7½ crores of rupees, as against a little over 7½ crores in the preceding year. There was thus an increase of 3.70 per cent. in the number of articles and of 31 per cent. in the amount specified for recovery. The number of value-payable articles posted in Calcutta was 1,811,512, as compared with 1,742,673 in the preceding year, and the Department realised on the delivery of these articles and paid over to the tradesmen of Calcutta a total sum of R2,12,05,211, or nearly one and a half million pounds sterling. The number of value-payable articles posted at Bombay rose from 904,039 to 924,689 during the year under review and the amount realised on the delivery of the articles and paid to the senders was R1,05,23,455, or nearly three-quarters of

a million pounds sterling. The total number of value-payable articles posted at Madras was 620,765, as compared with 566,257 in the preceding year.

The increase extended to all classes of value-payable articles except railway receipt notes, the number of which was slightly less than in the previous year. The average value of each value-payable article posted was R11-15-10, as compared with R12-6-4 in 1907-08.

The number of value-payable articles despatched from India to Ceylon was 71,558, of the aggregate value of R6,07,983, as compared with 67,140 articles valued at R5,08,117 in 1907-08.

#### Section IV.—Money Orders.

19. Appendix V (a) shows the entire money order transactions (including value-payable money orders) of the Department year by year for a period of ten years, separate figures being given for inland and foreign money orders. The total number of money orders issued during 1908-09 was 23,877,637 as compared with 23,075,478 in the previous year, and the total amount remitted was more than 42½ crores, as compared with over 41½ crores in the year 1907-08. Foreign money orders constitute, as usual, a very small percentage (3·12) of the entire transactions of the year. General money order business.

20. Appendix V (b) shows the issues and payments of inland money orders for 1908-09 according to postal circles and compares the results of the year with those of the previous year. More than 23 million inland money orders, ordinary and telegraphic, of the aggregate amount of over 39 crores of rupees were issued during the year; and the commission amounted to something over 45½ lakhs of rupees. There was an increase, over the transactions of the previous year, of 3·55 per cent. in the number of inland money orders issued, of 3·22 in their amount, and of 3·22 in the amount of commission realised. Inland money orders.

The average amount of an inland money order was R16-15-1, as compared with R16-15-11 in the preceding year.

21. Appendix V (b) also gives separate figures for telegraphic money orders. There was an increase both in the number and in the amount of such orders issued, as well as in the postal commission realised, which amounted to R2,85,469 as compared with R2,76,567 in the preceding year. The average amount of a telegraphic money order was R91-6-11 as compared with R89-9-2 in 1907-08. Telegraphic money orders.

22. The special classes of money orders for the payment of land revenue, rent, and miscellaneous Government dues are included under inland money orders in Appendix V (b), and separate figures are not shown there for these classes of orders. Special money order business.

The revenue money order system is in force in Bengal, Eastern Bengal and Assam, the United Provinces, the Central Provinces, the Punjab, the North-West Frontier Province, and Madras, and was extended during the year to the Bombay Presidency. In Bengal and Eastern Bengal and Assam taken together, although the number of revenue money orders fell from 338,479 to 335,558, their value rose from R26,63,417 to R27,07,563 during the year under report. In the Central Provinces, the number and amount of revenue money orders, which had shown a falling off during the last few years, increased in number during the year under report from 17,543 to 36,423 and in amount from R7,19,250 to R12,69,627. In the Punjab and North-West Frontier Circle, although the number of orders rose from 17,093 to 17,422, their value decreased from R15,40,156 to (1) Revenue money orders.

R14,30,334. In the United Provinces, both the number and amount of revenue money orders increased, from 245,113 to 291,237 and from R45,02,743 to R56,56,892, respectively. In Madras, the number of orders rose from 4,273 to 4,381 and their amount from R41,475 to R46,293.

(2) Rent money orders.

The rent money order system is in force in Bengal, Eastern Bengal and Assam, the United Provinces, and the Central Provinces. In Bengal and Eastern Bengal and Assam taken together, the number of orders rose from 62,987 to 65,071 and their amount from R9,82,907 to R10,25,548. In the Central Provinces, the number of orders increased from 2,246 to 2,415 and their amount from R48,335 to R53,146. In the United Provinces, the number of rent money orders was 131,197 of the aggregate amount of R16,11,074, as compared with 110,962 orders of the aggregate amount of R13,49,569 in the year 1907-08.

(3) Remittance of miscellaneous Government dues by money orders.

The system of remitting other miscellaneous Government dues by money orders is in force in Bengal, Eastern Bengal and Assam, the United Provinces, the Punjab, the North-West Frontier Province, Madras, and Burma. In Bengal and Eastern Bengal and Assam taken together, the progress reported in previous years was fully maintained. The number of official money orders increased from 137,214 to 172,113 and their amount from R29,61,432 to R33,70,042. In the United Provinces, the number of orders rose from 77,105 to 170,017 and their amount from R11,28,794 to R17,28,554. In Madras, the number of official money orders was 7,479 of the aggregate amount of R1,07,258, as compared with 8,054 orders in 1907-08 amounting to R1,12,727. In the Punjab and North-West Frontier Circle, although the number of these orders increased from 5,261 to 5,749, their amount fell from R1,78,975 to R1,25,579; while as regards Burma, it is unfortunately not possible to give figures for the year under review as it appears from the report of the Postmaster-General that, owing to some misunderstanding on the part of the postmasters concerned, separate statistics of these special money order transactions were not maintained.

foreign money order business.

23. Figures relating to the money order exchanges with foreign countries will be found in Appendix V (c), which shows both sterling money order exchanges, which are in force with the United Kingdom and its Colonies and with foreign countries generally and rupee money order exchanges, which are in force chiefly with countries and places in the Far East and Africa. The money order transactions with the Native States of India which have separate postal arrangements are also included, for convenience, in this Appendix.

(1) Sterling money orders.

The total number of sterling money orders issued by India rose from 123,375 in 1907-08 to 127,639, this result being due principally to an increase of over 2,800 in the number of remittances sent by money order to the United Kingdom and of nearly 700 in the number of remittances sent to France. The number of sterling money orders received for payment in this country, dropped from 73,641 in 1907-08 to 68,099. This was due mainly to a decrease in the number of remittances received from Egypt, Cape Colony, and the Transvaal. The remittances from Egypt fell from 6,145 to 3,551, those from Cape Colony from 5,313 to 3,931, and those from the Transvaal from 7,178 to 5,179.

In the case of issues from India, the average amount of a sterling money order was £3-16s.-1d., as compared with £3-8s.-1d., and in the case of payments £8-10s.-9d., as compared with £10-10s.-7d., in the preceding year.

(2) Rupee money orders.

In the rupee money order exchanges the chief transactions consist of remittances to India. These showed an increase during the year, the total number of rupee orders, received for payment in this country being 286,414, as

compared with 273,039 in 1907-08. There was a rise of 13,190 in the number of orders from Ceylon, of 2,594 from Zanzibar, of 1,392 from the Straits Settlements, of 695 from Portuguese India, and of 624 from Hongkong. On the other hand, there was a fall of 2,862 in the number of money orders received from the Federated Malay States, of 972 from German East Africa, and of 944 from British East Africa.

The average amount of a rupee money order was R43-10-9, as compared with R40-0-10 in 1907-08, in the case of issues from India; and R46-5-3, as compared with R47-5-5 in the preceding year, in the case of payments.

24. During the year there was a further increase in the sales of British postal orders, the total number sold being 309,048, as compared with 259,216 in the preceding year, their total value (including poundage) being £214,480 as compared with £178,937 in 1907-08. The chief increases occurred in the Punjab and North-West Frontier Circle, in Bombay, the United Provinces, Madras and Burma. Of the total number of British postal orders sold, nearly half, 150,393, were of the value of £1, while 35,319 were of the 10s. denomination, and 23,984 of the value of 5s. each. 50,736 orders of the aggregate value of £33,133-18s.-6d. were paid in this country in 1908-09, and of these, 6,052 of the value of £3,232-17s.-0d. were orders issued and paid in India as compared with 4,395 of the value £2,381-3s.-0d. issued and paid in India in the preceding year.

#### Section V.—Post Office Savings Banks.

25. Appendix VI shows in detail, according to postal circles, the Savings Bank transactions of the year, as compared with those of the previous year. There were 1,318,632 active accounts in existence on the 31st March 1909, showing a net increase of 55,869 or 4.42 per cent. The total amount at credit of depositors at the close of the year exceeded 15 crores 23 lakhs, and was 5 lakhs or .33 per cent. more than the balance at the close of the preceding year.

The deposits and withdrawals, exclusive of all transfers, decreased by over 86 lakhs and 49 lakhs, respectively, while the interest paid increased by nearly twenty-three thousand rupees.

The 1,318,632 active accounts were composed of—

	Crores.	Lakhs.
66,033 Security deposit accounts with a balance of	R 0	68½
8,956 Public accounts with a balance of . . .	" 0	59½
517 Regimental and other conjoint accounts		
with a balance of . . . . .	" 0	13½
160,365 Minors' accounts with a balance of . . .	" 2	64½
1,082,761 Ordinary accounts with a balance of . .	" 11	17½

The figures show that 94.27 per cent. of the accounts, and 60.72 of the total balance of 15 crores 23 lakhs represent savings of private persons. Of the total number of accounts open at the close of the year, 1,243,126 were held by private persons. In only 6,343 of these accounts, or .51 per cent., as compared with 6,384 or .33 per cent. in the previous year, were deposits subject to 6 months' notice of withdrawal, the deposits in the remaining accounts being at call. The number of accounts held by natives of the country represents 91.22 per cent. of the total number open at the close of the year.

Occupation  
of deposi-  
tors.

26. In appendix VI will be found a classification, according to their occupation, of depositors in the Post Office Savings Bank. It will be seen that, as in the preceding year, the largest number of accounts were held by the undermentioned classes of depositors in the following order:—

- (1) persons of no occupation or whose incomes are derived from others, classed as "Indefinite" in the statement,
- (2) the professional class, and
- (3) the domestic class.

Investment  
in Govern-  
ment secu-  
rities.

27. The number of Government promissory notes purchased through the Post Office was 3,107 of the nominal value of Rs16,42,500, as compared with 3,507 of the nominal value of Rs19,31,000 in the previous year. The number of Government promissory notes sold was 745 of the nominal value of Rs5,39,000, as compared with 675 of the nominal value of Rs4,14,100 in the preceding year. The nominal value of the Government promissory notes held in the custody of the Comptroller, Post Office, at the close of the year on account of depositors in the Post Office Savings Bank, was Rs57,59,300, as compared with Rs51,51,800 on the 31st March 1908. The value of securities in the custody of the Comptroller, Post Office, in the 3½ per cent. loans was Rs57,02,700, and in the 3 per cent. loans Rs56,600. During the year under report, 1,401 investment certificates for fractional amounts of Government promissory notes of the nominal value of Rs3,91,257 were purchased, as compared with 1,473 investment certificates of the nominal value of Rs3,58,006 purchased in the previous year. The number of investment certificates sold was 697 of the nominal value of Rs1,56,902, as compared with 656 of the nominal value of Rs83,535 sold in the preceding year.

Financial  
effect of the  
Post Office  
Savings  
Bank.

28. An estimate of the financial result of the working of the Savings Bank is given below, as directed in Resolution No. 2428 of the 13th May 1902 issued by Government in the Finance and Commerce Department:—

RECEIPTS.	Amount.	EXPENDITURE.	Amount.
	<i>R</i>		<i>R</i>
Interest at 3½ per cent. per annum on the balance of the deposits.	52,55,878	Interest actually paid to depositors . . . . .	43,40,968
		Estimated cost of managing the bank . . . . .	5,74,334
TOTAL .	52,55,878	TOTAL .	49,15,302

#### Section VI.—Miscellaneous.

Post Office  
Guarantee  
Fund.

29. The following statement shows the transactions of the Post Office Guarantee Fund. The balance at credit of the Fund, including the nominal value of Government securities held on its behalf, decreased from Rs10,63,276\* on the 31st March 1908 to Rs10,41,580 on the 31st March 1909. The conversion of Government Promissory Notes for Rs2,92,000 of the 3 per cent. loan of 1896-97 belonging to

\* See note (a) at foot of statement.

the Fund to Government Promissory Notes of the nominal value of Rs 2,50,300 of the 3½ per cent. loan of 1900-01 led to a decrease of Rs 41,700 in the balance of the Fund. Taking this into account, there was an increase of Rs 20,004 in the balance. The amount decreed against the Fund in connection with frauds committed by officials of the Department was Rs 11,634, as compared with Rs 11,864\* in the previous year and with an average amount of Rs 12,178 in the last ten years. A sum of Rs 36,868 was added to the Fund during the year on account of interest, while Rs 19,112 was invested in Government securities of the nominal value of Rs 20,000 out of the surplus of the Fund:—

RECEIPTS.				CHARGES.

(a) Differs from the closing balance shown in the Annual Report for 1907-08 by Rs 12 owing to that amount having been charged against the Fund after the publication of the Report.  
(b) Market value on 31st March 1909—Rs 6,78,207.

30. Supplies of the *Indian Postal Guide* are always available for purchase at post offices at the price of 4 annas a copy. With a view, however, to bring this publication more prominently to the notice of the public and to push its sale, an arrangement was introduced in 1907 for its issue, post free from Calcutta to any address, to subscribers for one or more complete years. Up to date about 1,200 regular subscribers have availed themselves of this arrangement.

31. The number of complaints recorded as having been made by the public was 51,124 against 46,718 in 1907-08, the percentage of increase being rather less than that shown by business done. The percentage of cases in which complaints were justified was only 32·16 or slightly less than in the previous year, while that of entirely groundless complaints was as high as 43·38 as compared with 39·18 in 1907-08. In the remaining cases either it was not possible to arrive at a definite conclusion, or the investigations had not been completed by

Indian Postal Guide.

Complaints by the public.

the end of the year. While much time and labour are expended every year in the investigation of cases where the Post Office is entirely free from blame (these being nearly half the total number dealt with), the opportunity afforded to us by the remainder to ascertain and correct faults in our working, as well as to detect thieves and careless workers, is invaluable.

Complaints  
regarding  
special  
classes of  
arti

32. During the year under report 4,615 complaints were received regarding the special classes of postal articles shown in the following statement :—

	Registered articles (other than parcels and insured and v.-p. articles).	Ordinary registered parcels.	Insured letters and insured parcels.	Value-payable registered articles of all kinds.	Total for 1908-09.	Total for 1907-08.
Number of complaints received	2,014	1,270	374	957	4,615	3,804

Out of these, enquiries showed that in 2,558 cases the Post Office was in no way to blame. In 788 cases no definite conclusion had been arrived at by the end of the year, while in 1,269 cases, or 27·4 per cent. of the total, the complaints were well grounded. 294 well-grounded complaints were made in respect of about 2½ millions of ordinary registered parcels, 116 in respect of nearly a million of insured articles, 331 in respect of nearly three millions of value-payable registered articles, and 528 in respect of over 17½ millions of registered articles of other kinds.

The number of inland registered articles in respect of which claims for compensation were dealt with was 431 as compared with 288 in the previous year. Compensation amounting to R2,212-7-8 was paid in respect of 162 articles, while applications for compensation in the case of 118 articles were rejected. 151 cases were still under enquiry at the close of the year.

Offences by  
servants of  
the Post  
Office.

	1907-08.		1908-09.	
	Number of cases.	Number of offenders.	Number of cases.	Number of offenders.
Convictions in courts of law	250	239	321	285
Cases departmentally punished	174	175	232	226
	424	414	553	511

Most of the remaining offences were committed in respect of letters, parcels, or other postal articles entrusted to the Post Office for conveyance. Among the offenders convicted or departmentally punished were 46 departmental postmasters and 41 clerks, 81 extraneous agents in charge of post offices, 219 postmen and village postmen, and 37 runners. The defalcations and losses amounted to R65,197-9-6, as compared with R36,856-4-10 in the previous year. R29,571-7-11 were recovered from the offenders or their sureties, R19,554-3-0 were decreed against the Guarantee Fund, R591-4-3 were written off as irrecoverable, and R15,480-10-4 remained unadjusted at the close of the year.

It will be seen from the above figures that the number (553) of cases of crime during the year under review shows an increase of 30·42 per cent. over the

number (424) of such cases in the previous year. This is probably merely an indication of the way in which a bad year throws temptations in the way of the poorer classes.

34. The offences against the Post Office committed by persons not belonging to the Department included 8 cases of money order frauds involving a sum of R203-0-0 and 5 cases of fraudulent withdrawals from the Savings Bank amounting to R1,070-2-3. There were also 85 cases of theft of Government money from the mails and post offices, besides 35 cases of highway robbery, which are dealt with separately. The total amount stolen was R12,338-7-3, of which R3,762-14-2 were recovered, R591-9-7 were decreed against the Guarantee Fund, R1,556-15-3 written off as finally lost, and R6,427-0-3 remained unadjusted at the close of the year.

Offences  
by other  
persons.

35. There were thirty-five highway robberies of the mail as compared with thirty-two in the previous year. Of these, twenty-seven occurred in British Territory and eight in Native States.

Highway  
robberies of  
the mails.

Of the robberies that occurred in British Territory, thirteen took place in Madras, five in the Punjab, four in the United Provinces, three in Bombay, and one each in Burma and Eastern Bengal.

The following seven cases were attended with loss of life :—

(1) A runner left the Poona City post office at 11 P.M. on the 9th July 1908 with mails. He was found murdered on the road at a distance of about 11 miles from Poona City. Of the two mail bags which he was carrying, one was found intact about a hundred yards from his dead body. The other had been opened and a sum of R73 contained in it abstracted. The Police failed to obtain any clue.

(2) The mails from Rajshahi to Nator in Eastern Bengal, a distance of 29 miles, are carried in wheeled conveyances supplied under a contract. The driver of the vehicle carrying these mails on the 3rd August 1908, was found hacked to death at a place about 25 miles from Rajshahi and 4 miles from Nator. The telegraph wire between the two places had been cut. Twenty-six mail bags had been opened and their contents were found strewn about the spot, but, with the exception of a parcel containing three volumes of the Public Works Department Code, nothing had been carried off. The remaining five mail bags had not been tampered with. The Police took up the investigation of the case and the District Magistrate offered a reward for information leading to the arrest of the murderers. On the 23rd September 1908 four men were arrested, one of whom turned approver. Of the other three, who were prosecuted, one died while the case was proceeding and the remaining two were acquitted by the Calcutta High Court.

(3) A runner, while conveying mails between Dudhi and Chopan post offices in the Mirzapur district in the United Provinces on the 15th August 1908, was murdered and a sum of R200 contained in the mail conveyed by him was carried off. The Police arrested two men on suspicion, but both were acquitted.

(4) In October 1908, a gang of about 50 Mahsud outlaws crossed over from Afghan Territory with the intention of avenging the death of one of their companions who had been killed in an encounter with the Militia. For two days they lurked about the Tanai-Sarwakai road in the hope of surprising a Militia patrol or picquets. Failing in this, they cut the telegraph wire on the 21st October 1908 and on the same date, intercepted two runners who were conveying mails and killed them both. They then cut open the mail bags and tore the

contents into pieces. With the exception, however, of postage stamps worth R 18 the mails contained nothing of value.

(5) A runner carrying mails on the Kovur-Dumagudiem mail line in the Madras Circle was murdered on the night of the 20th November 1908 at a place between Gunnavaram and Aswarowpet in the Nizam's Dominions. The runner should have been accompanied by a second runner and also by an armed sowar provided by the Nizam's Government. The sowar, however, failed to join the runner, while the second runner, by a private arrangement with the murdered man, was awaiting the latter's arrival at Aswarowpet. When the runner carrying the mail did not turn up at the appointed time and place, the other runner went in search of him and found him lying dead on the road with his throat cut. Of the mail bags, which were lying close by, two had been opened and two parcels, each insured for R400, abstracted from them. The Nizam's Police at Aswarowpet took up the investigation and arrested a constable of the police station at Jeelugumilli and another man of that place. A second constable of the same police station was also suspected but he escaped arrest by committing suicide. Of the two men arrested, who were subsequently placed on their trial, the constable was acquitted and the other man convicted.

(6) A mail sowar with mails left the post office at Shahdadpur in Upper Sind at 5 P.M. on the 15th December 1908. When nearing a village, 8 miles from the post office at Garhi Khairo, he was attacked by two Baluchis who felled him from his horse by severe lathi blows on the head. They did not tamper with the mail bag as they concluded that it contained nothing of value, but decamped with the mail sowar's coat, belt, and sword. The wounded man was removed to hospital where he died of his injuries on the 19th December 1908. The Police failed to trace the guilty parties.

(7) A runner was found early on the morning of the 25th January 1909 clubbed to death on the mail line from Kharepatan to Ratnagiri in the district of Ratnagiri. The contents of the mails which he had been carrying were found scattered about on the ground some 180 paces from his body. The Police failed to find any clue to the murderers. The mails contained nothing of value.

Two other serious cases, though fortunately not attended with loss of life, may be mentioned. The first occurred in the Tochi Valley. At about 5 P.M. on the 12th April 1908 the mail runner attached to the post office at Spina Khaisora, while returning with the mails from Datta Khel, was attacked by a party of men in the Spina Khaisora Pass. His cry for help being heard by the sentry at the Spina Khaisora Post, the Jemadar in command of the Post, with a force of thirty rifles, at once proceeded to the spot; but the robbers had run away before his arrival, carrying with them the entire mail and the pony on which it was being conveyed. The plundered mail and the pony were subsequently traced to a Waziri family who restored the mails and the pony on payment of R35. In the second case, which occurred in Tibet, a mule driver who was returning with the mails from Phari was fired on by three Tibetans. The mule driver fled leaving the mails behind. His assailants opened the mail bags and scattered their contents. Fortunately, the mails did not contain any cash or valuables.

In only eleven of the cases of highway robbery did Government suffer loss. Of this loss, amounting to R550-4-3, a sum of R183-4-0 represented cash

and stamps stolen and Rs 367-0-3 the amount of compensation which had to be paid for the loss of registered and insured articles. The entire mail was recovered in eleven, and part of the mail in seventeen other cases, while, in the remaining seven cases, the whole mail was lost. Fourteen prosecutions were instituted, in five of which convictions were obtained.

In addition to the cases of actual highway robbery mentioned above, there was one unsuccessful attempt to rob the mails. This took place in British Territory.

36. There were various other cases during the year in which the lives of postal servants were lost and mails and postal property destroyed. In August 1908 a mail runner, on the Mukerian-Gurdaspur mail line in the Punjab, was drowned while attempting to cross the Beas river in flood in an over-crowded boat. In the same month a runner in the Mirzapur District of the United Provinces met with a similar accident while crossing the river Sone. In September 1908 a runner on the Jagdalpur-Bhopalpatnam mail line in the Central Provinces was bitten by a venomous snake when asleep in his stage-hut and died from the effects of the bite. In the same month a postman in the Darbhanga District in Bengal also died from a snake-bite while on duty in a village within his beat. In October 1908 a boatman attached to the Diamond Harbour post office in Bengal was carried away by a tiger in the Masum Jungle in the Sunderbans. In February 1909 the branch postmaster of the Purneah Railway Station post office lost his footing while attempting to board the mail van of a train in motion in order to exchange mails with the Railway Mail Service section and was killed.

On the 24th February 1909 two runners were buried under an avalanche while carrying mails between Chillum and Astore on the Gilgit line.

During the year twenty-seven post offices were destroyed by fire and two collapsed owing to heavy rains. In a cyclone which passed over Akyab on the 11th November 1908 the local post office building was considerably damaged and a mail boat conveying mails from the jetty to a steamer sank. There was, however, no loss of life and the mails were only slightly damaged.

37. Appendix VIII, an abstract of which is given in the margin, shows the

POSTAL OFFICIALS.	1907-08.	1908-09.
Chief officers of Direction, Account officers, and Heads of Circles and Superintendent, Work-shop, Aligarh	33	33
Superintendents, Probationary Superintendents, Assistant Superintendents and Inspectors	594	622
Postmasters including Deputy, Assistant, Sub and Branch postmasters	6,590	6,674
Extraneous agents, such as schoolmasters and stationmasters	11,377	11,918
Clerks	19,715	23,704
Postmen and other servants	24,654	25,886
Road establishment	20,639	20,377
Village postmen	8,335	8,299
Signallers and other servants employed for telegraph work in combined offices	3,453	3,674
TOTAL	88,400	91,187

entire staff of the Department, the numbers in the different classes being shown separately for each postal circle. On the 31st March 1909, the numerical strength of the Post Office establishment was 91,187 as compared with 88,400 at the close of 1907-08. This included 271 pensioned soldiers of the Native Army, of whom 67 were non-

Post Office staff.

commissioned officers and 204 sepoys. The number of women employed was 79, of whom all except 11 were either Europeans or Eurasians.

The total number of servants of the Department dismissed during the year was 612. Of this number 242 were postmen or village postmen and 45 belonged to the road establishment.

Use of  
private  
presses.

38. The charges incurred during the year on account of printing work done by private presses amounted to R22,572, as compared with R17,427, the revised figures for the year 1907-08.

### Section VII.—Non-postal Branches of the Post Office.

Postal Tele-  
graph  
offices.

39. During the year under report 128 combined post and telegraph offices were opened, and 15 previously existing offices were closed. There was, therefore, a net increase of 113 in the total number of combined offices as compared with a net increase of 107 during 1907-08 and 129 during 1906-07. Of the 128 new combined offices 126 were opened at places which had previously been without a Government Telegraph office and 85 at places where there had previously been neither a Government nor a Railway Telegraph office. The total number of combined offices open on the 31st March 1909 was 2,378 as compared with 2,265 on the 31st March of the preceding year. The number of postal servants who qualified as signallers was 577 and the total number of signallers employed was 3,455 as compared with 3,254 at the close of 1907-08. There were 1,067 boys employed as messengers in these offices as compared with 1,029 at the close of the preceding year.

Traffic  
statistics  
of combined  
offices.

40. In Appendix IX will be found the traffic statistics of combined offices as supplied by the Telegraph Department. According to these there was a decrease of 369,063, or 6.02 per cent. in the number of messages sent; of 96,183, or 1.60 per cent. in the number received; and of R2,45,150, or 7.07 per cent. in the revenue realised on sent messages as compared with the figures of the previous year. The revenue from messages despatched from combined offices is given as R32,19,634, compared with R34,64,784 during the preceding year, while the total number of messages (excluding free messages) sent is given as 5,754,069 and the number received as 5,888,404. The falling off is attributed to the changes made in the telegraph rates from the beginning of January last and to the general depression of trade.

Telegraph  
receiving  
offices.

41. In addition to the telegrams sent and received by the 2,378 combined offices, there were 56,956 telegrams booked at receiving post offices for despatch by post to telegraph offices as compared with 65,821 in the previous year. The revenue realised on these telegrams was R31,704 as compared with R35,326 in 1907-08.

The number of telegrams received at post offices in the Persian Gulf on account of the Indo-European Telegraph Department was 628 against 615 in the year 1907-08, and fees to the amount of R4,002 were realised as compared with R3,426 in the previous year.

Carrying  
agency on  
the Kalka-  
Simla line.

42. The gross expenditure of the tonga service between Kalka and Simla was R1,82,557 as compared with R1,55,838 in the previous year, this increase being due to extraordinary charges on account of famine allowance and the purchase of new horses. The receipts amounted to R25,857 as compared with R22,416 in 1907-08. The difference between the receipts and expenditure amounting to R1,56,700 represents the cost to the Department of carrying all the mails, except overland parcels, by road between Kalka and Simla.

Receipt of  
salt revenue  
at post  
offices.

43. The Post Office acted as agent for the receipt of salt revenue at certain selected offices in the Punjab, the United Provinces, the Central Provinces, Rajputana and Bengal. It will be seen from the following comparative

figures that there was some little increase in the very petty business done through the Post Office in comparison with the previous year :—

		1908-09.	1907-08.
Post offices authorised to receive salt revenue . . . . .	No.	307	297
Indents received . . . . .	No.	1,520	1,473
Quantity of salt indented for . . . . .	Mds.	403,417	364,921
Value " " " " . . . . .	R	4,63,619	4,24,526
Postal commission realised . . . . .	R	964	926

44. The Post Office obtained for sale to the public about 7,549 lbs. of quinine, as compared with 7,120 lbs. in the previous year. The sales in the United Provinces and Punjab and North-West Frontier Circles were considerably greater than in the preceding year owing chiefly to the prevalence of malaria, but in the Bengal Circle there was a falling-off in the quantity sold, owing to the establishment of new agencies for the sale of quinine and to the free distribution of the drug by charitable dispensaries and other benevolent institutions.

45. Appendix X shows the operations of the scheme of Life Insurance, Endowment Assurance, and Monthly Allowances, as compared with those of the previous year, and Appendix XI shows the financial results of the administration of the Postal Insurance Fund up to the end of the year under report. During the year 2,665 new policies were issued of the aggregate value of R33,16,805, of which 497 of the aggregate value of R6,94,250 were Life Insurance policies, while 2,168 of the aggregate value of R26,22,555 were policies of Endowment Assurance. The total sum realised on account of premia on both old and new policies amounted to R9,93,950 as compared with R8,74,055, the revised figure for the previous year. Claims to the extent of R4,14,741 were discharged as compared with R3,48,190 during the preceding year; while ninety-two Life Insurance policies representing a gross assurance of R1,17,250, and one hundred and eighty-two Endowment Assurance policies representing R2,04,443 either lapsed or were surrendered or cancelled. The lapses and surrenders during 1907-08 were fifty-four Life Insurance policies, representing a gross assurance of R71,300 and ninety-two Endowment Assurance policies, representing R84,707.

Of the 2,665 persons holding policies issued during the year, 2,607 were pure Asiatics by race. Three women employed under Government were insured, and as the policy of one female employee was allowed to lapse during the year, there are now fourteen female policy-holders in all. The general results of the past two years are summarised below :—

Life Insurance and Endowment Assurance.	Up to 31st March 1908.	Up to 31st March 1909.
Number of lives insured . . . . .	18,107	20,772
	R	R
Amount received in premia . . . . .	61,22,809*	71,16,759
Amount of Insurance . . . . .	2,51,85,244	2,85,02,049
Amount of claims met . . . . .	19,95,006	24,09,747

\* Revised figure.

At the close of the year there were 17,621 active policies in existence, representing an aggregate insurance of R2,43,87,767, of which 7,660 were held by Post Office servants and 9,961 by persons employed in other Departments. Seven new contracts for Monthly Allowances were entered into during the year, and there were 126 such contracts in existence at the end of the year, the total of the Monthly Allowances contracted for being R1,224-3-5. As in the previous year only one contract was allowed to lapse.

Four Life Annuities were purchased from the Post Office under Article 807 of the Civil Service Regulations.

Payment of  
military pen-  
sioners.

46. The pensions of 35,387 pensioners of the Native Army were paid through the agency of the Post Office in the Punjab and North-West Frontier during 1908-09 as compared with 33,143 in 1907-08, and the amount paid on this account was R24,08,362-4-7 as compared with R22,61,195-10-11 in the previous year. The Post Office received only R18,062-11-3 for its service.

### Section VIII.—Financial Results.

Receipts  
and  
Charges.

47. The total receipts and charges of the year as shown in the Post Office Accounts and given in Appendix XII are as under :—

Receipts.		Charges.	
1907-08.	1908-09.	1907-08.	1908-09.
R	R	R	R
2,73,59,985	2,73,68,702	2,56,02,793	2,76,71,132

According to the figures above, the charges for 1908-09 exceeded the charges for 1907-08 by R20,68,339, the receipts for 1908-09 exceeded the receipts for 1907-08 by R8,717, and the charges for 1908-09 exceeded the receipts for the same year by R3,02,430.

The receipts for 1908-09 as shown above allow only R2,12,59,915 as the Post Office share of the total revenue from the sales of postage stamps, that is, the amount left out of the total revenue from that source after crediting the Civil Department with the fixed sum of R18,95,000 and the Telegraph Department with the R70,67,987 which it claims. There are unfortunately no data now available for checking the claim of the Telegraph Department, so that it is impossible to say whether the sum which has been left as the share of the Post Office is ever approximately correct. For the reasons given below, the figure appears to be very far from correct. For the year 1907-08, in the latter half of which the reduction in the letter and parcel postage rates began to take effect, the Post Office realised a sum of R2,13,86,779 on the sales of postage stamps, and, having regard to the increase of about R8,00,000 in that year over the preceding year, and of about R12,00,000 in 1906-07 over 1905-06, the figure for 1908-09 should have been very substantially higher than R2,12,59,915, in spite of the fact that the general conditions of the country were abnormally bad. It will be seen too from a comparison of the figures in paragraph 9 of this Report with those in the corresponding paragraphs of the

Reports for 1907-08 and 1906-07, that there was in 1908-09 a specially large increase in the amount of correspondence. Further, the Revised Estimate prepared by the Comptroller, Post Office, put the figure at Rs. 22,09,000 and there is no reason to believe that the actuals were very considerably below that amount. It is realised of course, that the question whether the claim of the Telegraph Department is correct or incorrect does not affect the revenue of the Post Office and Telegraph Department taken together, but it is right to point out that circumstances do not allow of our financial results for the year 1908-09 being shown with any degree of accuracy. Now that proper machinery exists for estimating the share of the Telegraph Department out of the total revenue from the sales of postage stamps, this unsatisfactory position is not likely to occur again.

With regard to the increase in charges, it should be pointed out that, if the payments on account of grain compensation during 1908-09 had been equal to, instead of larger by Rs. 5,42,100 than, those during 1907-08, and if a sum of Rs. 1,81,300 had not been paid during 1908-09 on account of the "Fiftieth Anniversary Bonus," the charges for 1908-09 would have exceeded those for 1907-08 by only Rs. 13,44,939, a sum very much smaller than the increase for several years past. It should also be noted that the charges for 1908-09 include the entire cost of manufacture of postage stamps used for telegraph purposes.

48. Appendix XII shows also under a distinct head (II) certain charges which appear in the Finance and Revenue Accounts but not in the Post Office Accounts. These

	R
Stores from England . . . . .	315
Payments under postal arrangements with Lords of the Treasury . . . . .	8,18,820
Other miscellaneous payments . . . . .	2,700
<b>TOTAL</b>	<b>8,21,835</b>

charges are reproduced in the margin and, if their total be added to those given in the table in the preceding paragraph,

the total charges of the year amount to Rs. 2,84,92,967. It will thus be seen that there was a deficit of Rs. 11,24,265 on the year's transactions as shown in the Finance and Revenue Accounts. In order, however, to arrive at the true financial result of the year's administration it is necessary to add to the charges a further sum of Rs. 11,46,428 representing the net balance of the items

	DETAILS.	TOTAL.
	R	R
<b>Add to charges—</b>		
Railway free service estimated . . . . .	12,437	
Rent of government buildings . . . . .	5,41,381	
Gratuities . . . . .	5,871	
Leave allowances paid out of India . . . . .	59,642	
Pensions (being the average of five years, capitalised at 10½ years' purchase) . . . . .	10,94,333	17,13,664
<b>Deduct—</b>		
Share of Marine subsidies which should strictly have been borne by the Military, Political and other Departments . . . . .	5,61,457	
Postage on unpaid official correspondence sent from India to the United Kingdom (formerly collected and brought into account) . . . . .	5,779	5,67,236
<b>Net amount to be added</b>		<b>11,46,428</b>

shown in the margin. The result is that the charges exceeded the receipts by Rs. 22,70,693. After taking credit for the sum of Rs. 4,64,779, representing the net expenditure during the year on account of

unremunerative establishments formerly paid from District Post funds, the deficit is reduced to Rs. 18,08,914. This figure has, however, been arrived at without taking into account the services rendered by the Department to a large number of Native States in carrying their official correspondence free of charge in accordance with the arrangements under which their postal systems have been amalgamated with the Indian Post Office. The total value of these

services for the year 1908-09 has been estimated at R1,81,930 and if credit is taken for this sum the deficit is reduced to R16,26,984 as compared with a net surplus of R3,26,937 in 1907-08. It has been explained, however in the preceding paragraph that the actual revenue for the year cannot be stated accurately. If the Post Office share of the revenue from the sales of postage stamps had been as much as R2,00,000 below the Comptroller's Revised Estimate, the deficit would have been only about R9,00,000.

This estimate of the financial position of the Post Office does not take into account the services rendered by the Department to Government in the management of the Post Office Savings Bank.

Financial  
result of  
working  
the posts  
in  
Kashmir.

49. The following figures show the financial result of the amalgamation of the posts in the Kashmir and Jammu State with the Imperial Post Office.

The amalgamation took place in November 1894 and, except in 1905-06, when there was a small surplus, the working of the Kashmir post offices has always resulted in a loss, owing to the very expensive lines which have to be maintained to serve Gilgit and Leh. The total revenue in 1908-09 was R1,88,891 as compared with R1,60,307 in 1907-08 and R1,45,588 in 1906-07. The expenditure during 1908-09 was R2,21,577 against R2,14,483 in 1907-08 and R2,01,482 in 1906-07, the actual deficit during the year being R32,686. The increase in revenue was normal, while the rise in expenditure was chiefly due to revision of establishment, grain compensation allowance, and the bonus given on the occasion of the 50th anniversary of the assumption of the Government of India by the Crown.

#### Section IX.—Notices of Officers.

Mention of  
Officers of  
the De-  
partment.

50. The death of Mr. J. W. K. McCrea, Assistant Director-General deprived me of an assistant whose conscientious hard work, quiet unassuming mastery of the duties of the Post Office, and large experience of practical details were of the greatest assistance in my office.

Soon after the close of the year Mr. G. R. Peter severed his connection with the Post Office, which had lasted nearly 43 years, during which time his zeal and industry and ability had earned him a very high reputation in the Madras Circle.

So many officers have earned my gratitude by rendering valuable services to the Department during the year that I feel that it would be invidious to select any names for special mention.

I have the honour to be,

SIR,

Your most obedient servant,

C. STEWART-WILSON,

*Director-General of the Post Office of India*

SCHEDULE OF PRINCIPAL STEAM SERVICES, 1908-09.

*By the British India Steam Navigation Company.*

- (1) Direct communication three times a week between Calcutta and Rangoon.
- (2) Weekly communication between Chittagong, Akyab, Kyaukpyu, Sandoway and Rangoon.
- (3) Weekly direct communication between Madras and Rangoon.
- (4) Communication three times a week between Rangoon and Moulmein.
- (5) Weekly communication between Rangoon, Tavoy and Mergui.
- (6) Fortnightly communication between Moulmein, Yeh, Palaw, Tavoy, Mergui and Bokpyin.
- (7) Weekly direct communication between Bombay and Karachi.
- (8) Weekly communication between Bombay and Karachi *via* the Coast ports.
- (9) Weekly communication between Karachi and Busrah *via* the Persian Gulf ports.
- (10) Weekly communication between Karachi and Busrah *via* the *principal* Persian Gulf ports.
- (11) Daily communication between Tuticorin and Colombo.
- (12) Fortnightly service from Negapatam to the Straits.
- (13) Additional services between any of the ports served by the above-mentioned lines, between any of the ports on the Coromandel Coast and Rangoon.

Under contract with the Post Office from 1st May 1904 on an annual subsidy of Rs10,00,000.

- (14) Direct weekly communication between Rangoon and Penang and back.

Under contract with the Post Office from 1st July 1908 on an annual subsidy of Rs70,000.

*By the Asiatic Steam Navigation Company.*

- (15) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.

The consideration is not in the form of a subsidy, but of guaranteed rates for the transport of Government stores; the contract is for five years, from 1st July 1901, and is terminable after the five years by a notice of six months. The contract actually terminates on the 30th June 1909.

*By the Irrawaddy Flotilla Company, Limited.*

- (16) Communication three times a week between Rangoon and Bassein.
- (17) Daily communication (Sundays excepted) between Bassein and Myaungmya.
- (18) Daily communication (Sundays excepted) between Prome and Thayetmyo and Minbu.
- (19) Communication twice a week between Thayetmyo and Pakokku.
- (20) Daily communication (Sundays excepted) between Magway and Sale.
- (21) Daily communication (Sundays excepted) between Sale and Pakokku.
- (22) Daily communication (Fridays excepted) between Myingyan and Pakokku.
- (23) Weekly communication between Pakokku and Kindat.
- (24) Weekly communication (provided the depth of the water permits) between Kindat and Homalin.

Under contract with the Burma Government for a period of five years from 1st November 1908. The subsidy, Rs11,750 per mensem, is paid by the Burma Government.

*By the Irrawaddy Flotilla Company, Limited—continued.*

- (25) Communication six times a week between Katha and Bhamo. } Under contract with the Burma Government to continue in force until twelve months' notice is given by either party. The subsidy Rs1,500 a month is paid by the Burma Government.
- (26) Weekly communication between Moulmein and Kya-in. } Under contract with the Burma Government to continue in force until six months' notice is given by either party. The subsidy Rs100 per mensem is paid by the Burma Government.
- (27) Daily communication between Rangoon, Pyapon, Maubin, and Yandoon. } Under contract with the Burma Government to continue in force until six months' notice is given by either party. The subsidy, which is paid by the Burma Government, being Rs400 per mensem.
- (28) Communication three times a week between Moulmein, Shwegun and Kama-maung. } Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy, which is paid by the Burma Government, being Rs500 per mensem.
- (29) Communication three times a week between Moulmein and Kyondo. }
- (30) Daily communication (Sundays excepted) between Moulmein and Natmaw. } Under contract with the Burma Government to continue in force until six months' notice is given by either party, the subsidy, which is paid by the Burma Government, being Rs260 per mensem.
- (31) Daily communication (Sundays excepted) between Moulmein and Kado. }
- (32) Daily communication between Wakema and Myaungmya. }
- (33) Daily communication between Myaungmya and Moulmeingyun. }
- (34) Daily communication between Wakema and Moulmeingyun. } Under contract with the Post Office to continue in force until two months' notice is given by either party, the monthly subsidy being Rs280.
- (35) Daily communication between Wakema and Kyonmague. }

*By the Arracan Company, Limited.*

- (36) Communication three times a week between Akyab and Buthidaung. }
- (37) Communication thrice a week between Akyab and Paletwa. }
- (38) Communication once a week between Akyab and Kyauktaw. }
- (39) Communication once a week between Akyab and Myaungbwe. } Under contract with the Burma Government for five years from 1st April 1905. Subsidy Rs70,750 a year is paid by the Burma Government.
- (40) Weekly communication between Akyab and Sakanmaw *via* Myebon and Kyaukpye. }
- (41) Weekly communication between Akyab and Sandoway *via* Kyaukpyu. }

*By the Euphrates and Tigris Steam Navigation Company.*

- (42) Weekly communication on the river Tigris between Busrah and Bagdad. } Under contract for ten years, from the 1st May 1904, with His Majesty's Secretary of State for India. Subsidy Rs24,000 per annum: steamers to run in connection with line No. 10.

*By Messrs. Apcar & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.*

- (43) Communication at irregular intervals between Calcutta and the Straits Settlements and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales. } No subsidy.

*By the Peninsular and Oriental Steam Navigation Company.*

- (44) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras. }
- (45) Fortnightly communication between Bombay and Colombo. } Non-contract lines maintained by the company in connection with the China and Australian mail services. Under Article 20 of the contract between the Peninsular and Oriental Steam Navigation Company and His Majesty's Postmaster-General relating to the conveyance of the East India, China, and Australia mails, mails sent by these non-contract steamers are conveyed without any payment other than the subsidy specified in that contract.

*By other Agencies.*

- (46) Worked jointly by the Rivers Steam Navigation Company and India General Navigation and Railway Company.—Daily communications between Rowmari and Dhubrihat, between Dhubrihat and Gauhati, and between Dhubrihat and Tazpur on the Brahmaputra River. } Under contract with the Post Office from the 1st May 1906 to the date of opening for the public traffic of the Dhuhri-Gauhati section of the Eastern Bengal State Railway. Annual subsidy, Rs 75,000, towards which the Bengal and the Eastern Bengal and Assam Governments contribute Rs 50,000.
- (47) By the Bombay Steam Navigation Company.—Daily communication between Bombay and Goa. } Under contract with the Post Office from 1st October 1908 to 31st May 1909. The monthly subsidy paid by the Post Office is Rs 3,000, towards which the Goa Government contributes Rs 200.
- (48) By M. G. Bwin and Brothers.—Weekly communication between Kyaukpyu and Cheduba, Kyaukpyu and Ramree, Sandoway and Singaing Sandoway, Taungup and Kyaukpyu. } Under contract with the Burma Government for five years from 1st April 1905. Subsidy, Rs 23,200 a year.
- (49) By Messrs. Cowasjee, Dinshaw and Brothers.—Weekly communication between Aden, Berbera and Zeyla. } Under contract with the Government of the Somaliland Protectorate for twelve months, from 1st April 1908 to 31st March 1909. The monthly subsidy is Rs 1,050, of which sum Rs 300 is at the sole charge of the Protectorate Government, and the balance, *viz.*, Rs 750, is paid in equal shares by the Protectorate Government and the Indian Post Office.
- (50) By the Retriever Flotilla Company.—Communication four times a week between Chittagong and Cox's Bazar. } Under contract with the Post Office from 1st June 1908 to 31st May 1913. Subsidy Rs 5,700 a year.

## Appendix I.

Statement showing, according to postal circles, (1) the number of post offices, letter-boxes and village postmen, and (2) the distances over which mails were conveyed by railway, mail carts, runners and steamers at the close of the year 1908-09 and of the preceding year.

*Statement showing, according to postal circles, the number of cases in which servants of the Post Office were held to be guilty of offences punishable by law and the number of servants of the Post Office punished in those cases during the year 1908-09.*

NOTE.—The figures in this Appendix show the cases in which punishment was awarded during the year, as it is only when a case is closed that it can be entered with certainty as having been committed by a Post Office servant. Besides the 553 cases shown above, there were 92 cases in which postal servants were charged with offences but no punishment was imposed owing to the cases not being concluded on the death or escape of the offenders.

*Statement showing the Post Office staff for the year 1908-09 and the preceding year.*

## Appendix IX.

Statement showing the traffic statistics of combined (post and telegraph) offices for the year 1908-09.

NAMES OF POSTAL CIRCLES.	Number of combined offices open on 1st March 1909. Director-General of Commercial IntelligenceB. ROBERTSON,  
Secretary to the Government of India

Calcutta, November 5, 1909

 *Continuation Sheets of Supplement to the Gazette of India published at Calcutta.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 4th November 1909, based on the Indian Daily Weather Reports of the period.**

Two depressions appeared over the Andaman Sea, but neither developed into a storm. The only important effect they had upon the weather was to give rain in Burma, where the rainfall of the week was in consequence above the average.

Rainfall was of almost daily occurrence in the south of the peninsula and on the 1st and 2nd showers were reported from the south of the Konkan coast, but the amounts recorded were generally small and the only division in this part of the country that received more rain than usual was Mysore. An area of squally weather appeared off the Malabar coast on the afternoon of the 2nd, and the observations at the coast stations on the 3rd and 4th showed that pressure was low over the Arabian Sea, but if a storm formed in this low pressure area it was at too great a distance from land to afford indications of its position or intensity.

A feeble disturbance of the winter type gave a few falls of rain and snow in Kashmir on the 1st November.

Temperature was higher than usual over the greater part of northern India.

*Burma.*—Rain fell at every observatory south of Monywa. Skies were lightly to moderately clouded, and temperature was nearly normal.

*Northeast India, including Orissa.*—Sibsagar and Narayanganj were the only stations that reported rain. Skies were nearly free from cloud except on the 31st October when moderately heavy cloud covered deltaic Bengal. Temperature was in general slight to moderate excess.

*The United Provinces, Central India and the Central Provinces.*—Skies were clear or only lightly clouded. Temperature was higher than usual, the excess on most days being shown chiefly in the maximum.

*Northwest India.*—Light falls of rain and snow were reported from Kashmir on the 2nd November. Skies were cloudy in the extreme north on the 1st and 2nd November, and cloud appeared in Gujarat on the 3rd. Temperature was unusually high over the greater part of the division, the minimum reported on the 2nd being from  $12^{\circ}$  to  $18^{\circ}$  in excess at Srinagar, Lahore, Khushab, Dera Ismail Khan and Jacobabad.

*The Peninsula.*—Rainfall occurred locally in the southwestern districts and was most widespread on the 31st October. Skies were clear or lightly clouded in the north and were moderately clouded in the south. Temperature was in excess in the Deccan and the southeast of Madras.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

October 29th. Toungoo 2·50".

" 30th. Rangoon 1·26".

" 31st. Minbu 1·44", Monywa 3·03" and Narayanganj 7·80".

November 1st. Moulmein 1·30", Yamethin 1·28" and Negapatam 1·87".

" 2nd. Karwar 1·28".

" 3rd. Tavoy 1·68".

" 4th. Cochin 2·15".

The departures from the normal in the seasonal rainfall from 30th April to date have not changed much during the past week ; a defect of 20 per cent or more is still shown in the Central Provinces, Central India and Baluchistan, and a similar excess in Bengal proper, Rajputana, the east and north of the Punjab and the North West Frontier Province.

Secretary to the Government of India.

SIMLA;  
The 4th November 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,  
30th October 1909.

**Burma.**—The rain reported from all districts was generally heavier than last week and in most of the dry zone districts harvesting of minor crops is generally prosperous and progress of agricultural operations satisfactory. There are no important changes in the prices of unhusked rice.

**Eastern Bengal and Assam.**—The weather was seasonable during the week. In many districts no rain fell while in the rest the fall was slight. In Lakhimpur more rain is required for tea. Prospects of winter rice, tea and pulses are good and of cotton fair. Sowing of mustard, tobacco and other spring crops has commenced but ploughing for these crops is still in progress in some places. Harvesting of paddy and cutting jungle for new jhums continue in the hills. The average price of common rice is almost stationary. Cattle disease prevails in three districts.

**Bengal.**—Light rain fell in Orissa during the week. In Lower Bengal the rain previously received was enough for the agricultural operations of the week. There was no rain in Behar and Chota Nagpur. Some more rain is reported to be wanting for winter paddy grown on high lands in Burdwan, Bankura, Patna, Gaya, Shahabad, Saran, the Sonthal Parganas and Palamau. Winter paddy was damaged by the recent cyclone in Murshidabad and Jessore. Prospects of this crop are favourable. Sowings of spring crops are in progress. The price of common rice has risen in the 24-Parganas, Nadia, Patna, Champaran, Darbhanga, Monghyr, Sambalpur and Hazaribagh, and has fallen in Jessore, Gaya, Shahabad, Saran, Purnea, the Sonthal Parganas, Angul, Puri, Ranchi, Palamau and Cooch Bihar. Reports of cattle disease have been received from several districts and it would appear that there has been much loss of cattle in Khulna where the cyclone was severe. The fodder and water-supply is sufficient throughout the province.

**United Provinces.**—There was no rain during the week. Harvesting of autumn crops and sowing of spring crops continue. Germination is reported to be good. The condition of standing crops and outturn are good. Late rice has suffered from deficient rain in one or two districts and insects have done some local damage to crops. The condition of agricultural stock is satisfactory. Cattle disease continues in seventeen districts. Fodder is ample. Markets are well stocked. Prices have risen in two districts and have fallen in twenty.

**Punjab.**—Slight rain was received at Murree in the Rawalpindi district. The condition of standing crops is generally good to average except in parts of Shahpur and Mianwali where the crops are suffering from prolonged drought. Harvesting of autumn crops and picking of cotton continue and the outturn is generally good to average. The outturn of cotton is below average in Sialkot, in unirrigated tracts of Shahpur and in parts of Lyallpur. Crops are being damaged by insects in Ambala and by rats in Ferozepore and Shahpur. Sowings of spring crops continue satisfactorily. Prices are generally unchanged but there is a slight fall in prices in Amritsar, Sialkot and Shahpur and a rise in Ferozepur and Gujranwala. The condition of cattle is generally good to fair. Fodder is sufficient except in parts of Shahpur and Mianwali. Complaints of short water-supply continue from the Samundri tahsil of the Lyallpur district.

**North-West Frontier Province.**—No rain fell during the week except 11 cents in the Hazara district. Rain is needed in Peshawar. The condition of standing crops is generally average throughout the Province. Sowings of spring crops are in progress. Autumn crops are being harvested and the outturn is generally average. The water-supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil of the Bannu district. Irrigation from the Paharpur canal in the Dera Ismail Khan district is still stopped. Cattle are generally in good condition throughout the Province. The

health of the people is generally good except that malarial fever is said to be prevalent in some parts of the Peshawar district. Prices are falling. Prices:—wheat  $11\frac{1}{2}$  to  $13\frac{1}{2}$ ; gram  $15\frac{1}{2}$  to  $17\frac{1}{2}$ ; maize  $13\frac{1}{2}$  to  $21\frac{1}{2}$ ; *bajra* 14 to  $17\frac{1}{2}$  and barley  $20\frac{1}{2}$  seers per rupee.

**Jammu.**—There was no rain during the week. Prices are stationary. Wheat sells from 10 to 16 and maize from 13 to 24 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type prevails in five tahsils of the Province. Fodder is sufficient.

**Kashmir.**—The weather was bright. There was no rain during the week. As a result of the last flood the condition of autumn crops was below average. The condition of irrigation is good. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

**Rajputana.**—Standing crops and prospects are good. Ploughing and sowing of land for spring crops are in progress. The condition of cattle is good except in parts of Mewar. Fodder is sufficient. Prices are falling in Banswara; are rising in Karauli and Mewar and are practically steady elsewhere.

**Central India.**—There was no rain during the week. Harvesting of autumn and sowing of spring crops continue. Crops have been damaged slightly by insects in parts of Gwalior, Bundelkhand and Bhopal. Agricultural stock are satisfactory except that some cattle disease prevails in parts of Indore, Bundelkhand and Bhopal. Prices are high and stationary.

**Central Provinces.**—During the week Drug and Raipur received an inch of rain each while light rain (under  $\frac{1}{2}$  inch) fell in the Nagpur country, Amraoti and Yeotmal. *Juar* and cotton on light soil suffered slightly from want of moisture in Chhindwara, Warda, Nagpur and the districts of Berar, except Buldana. Insects are reported to have caused slight damage to linseed in Wardha and to *jadi* cotton in the Basim taluka of the Akola district. Picking of cotton and reaping of autumn crops continue. Sowing of spring crops is in progress and germination is successful everywhere except in Chanda where a shower would improve prospects. The condition of standing crops is good. The supply of fodder and water is sufficient. Agricultural stock are in good condition. Prices:—*juar* fell by 1 seer per rupee in Akola and by 2 seers in Chanda, Buldana and Yeotmal. Rice rose by 1 seer in Bilaspur and gram fell by 1 to  $1\frac{1}{2}$  seers in Amraoti and in the Vindhyan and Nerbudda Valley districts; elsewhere prices remain stationary or show a tendency to fall.

**Feudatory States.**—Light rain not exceeding 1 inch fell in seven States during the week. The condition of standing crops is generally good. Fodder and water are adequate. Prices:—rice in Kawardha, Raj-Nandgaon and Sarangarh and *kodon* in Kawardha fell; and rice in Raigarh and Sakti rose by 1 to 2 seers per rupee.

**Bombay.**—Slight rain fell during the week in Colaba, Kanara, Nasik, Ahmednagar, Dharwar and Kolhapur. Rain is needed in parts of Kanara and the Deccan. Standing crops are suffering from insufficient moisture in Kolhapur; they have been damaged slightly by rats in Hyderabad; by insects in Hyderabad, Nasik, the Karnatak and Kolhapur; and are generally good elsewhere. Harvesting of autumn crops is progressing in Hyderabad, Thar and Parkar, Khandesh and Ahmednagar. Threshing has commenced in Kaira, Broach, Thana, East Khandesh and Mahi Kantha. The fodder supply is generally adequate. Agricultural stock are sufficient, except in parts of the Deccan, and generally in good condition. Drinking and irrigation water is generally sufficient. Grain stocks are sufficient. Prices have fallen in parts of Sind, Sholapur and Bijapur; have risen in Belgaum and Dharwar; and are stationary elsewhere. The quantity purchasable per rupee is in Sind 3 to 35 per cent; in the Konkan 2 to 32 per cent; and in the Karnatak 3 to 26 per cent less than the normal. In Gujarat the quantity purchasable per rupee ranges from 3 per cent more than the normal to 20 per cent less and in the Deccan from 17 per cent more than the normal to 13 per cent less.

**Hyderabad.**—The rainfall during the week was 2 cents. There was very little rain during the week. Hadgaon in the Nander district reports 52 cents and Adilabad

Head Quarters of district 30 cents. No rain fell in other places. Autumn crops are generally fair to good but require more rain in parts of the Raichur district and Warangal division. The crop is being harvested generally. Spring sowings are still in progress but operations are suspended for want of rain in the Yellandu taluka. Spring operations require more rain throughout Telingana, especially in the Warangal division. Crops have been damaged by insects in parts of the Raichur, Medak and Nalgonda districts. Early rice is being weeded only in a few talukas of the Mahbubnagar district. The crop is fair to good but needs more rain or tank water in parts of the Warangal and Medak divisions. Harvesting of crops has begun. Lands for late rice are being prepared in parts. Cattle disease prevails in nine talukas. Prices:—wheat 6½; coarse rice 7, and *juar* 15½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers each in the Chinnur and Rajura talukas of the Adilabad district and the lowest 28 seers in the Nilanga taluka of the Bidar district.

**Mysore.**—There was no rain during the week. Prices of food grains are generally steady. Markets are well supplied. Standing crops are in good condition but more rain is needed for dry crops in parts of Bangalore, Kolar, Tumkur, Mysore and Hassan. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 40 cents. Rice is in good condition. Picking of cardamom continues. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall during the week was good in Ganjam; *nil* in the Deccan, Madras, North Arcot, South Canara and the Nilgiris; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Anantapur, Nellore, Chingleput and Tinnevely. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Vizagapatam, the Deccan, North Arcot and Tanjore require more rain; some in parts of Ganjam, Guntur, Nellore and Chingleput are withering and some in parts of Ganjam have been damaged seriously by cyclone. Harvests continue with outturn mostly fair to normal. Pasture is sufficient except in parts of Bellary and Nellore. Fodder is scanty in parts of Vizagapatam, Godavari, Bellary and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in nine and has risen in two. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts; has fallen in nine and has risen in four. *Cholam* is stationary in three districts; has fallen in two and has risen in nine. *Cumbu* is stationary in two districts; has fallen in eight and has risen in five. The public health is generally good. Prospects are generally good. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

**Nepal.**—*Report for the quarter ending 15th October 1909.*—The rainfall during the period was 36·32 against 26·02 for the corresponding period of last year.

**July.**—The standing crops of early rice and Indian-corn did well.

**August.**—Pears and apples were gathered, the outturn being good. Rice sowing was commenced in the Terai. The rainfall for this month was 22·34 inches, a record for Nepal.

**September.**—Chillies, early rice and Indian-corn were harvested in the Nepal valley and the hills. The outturn was very good.

Sowing of potatoes and early winter vegetables was commenced.

**October.**—Harvesting of the early rice crop has been commenced both in the Nepal valley and the hills. Millet is also being cut. Sowing of garlic and onions is in progress. Lands are being prepared for sowing of wheat, barley and peas for the spring crop.

The market is well stocked and the price of food-grains continues to be normal.

Disease is reported to be prevalent amongst cattle in the Nepal valley.

R. W. CARLYLE,

Secretary to the Government of India.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.SANITARY.  
PLAGUE.*Simla, the 4th November 1909.*

The following preliminary statement of plague seizures and deaths reported in India, during the week ending the 30th October 1909, is published for general information :

Presidency or Province.	Division.	Districts, States, Towns of 50,000 or more inhabitants, and Ports.	Plague seizures.	Plague deaths.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

Simla, the 2nd November 1909.

**Review of Irrigation in India in 1907-08.**

Read—

Endorsement No. 5-I., dated 23rd March 1909, from the Accountant-General, Public Works Department.

Provincial Revenue and Administration Reports of Irrigation Works for triennium ending 1907-08.

Irrigation Works are divided into two main classes—Major and Minor Works—the former being subdivided into (I) Productive and (II) Protective Works. Capital and revenue accounts are kept for all Major Works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts, or, indirectly, on account of enhancements of land revenue due to irrigation, is shown in the annual finance accounts.

**A—MAJOR WORKS.**

**I.—Productive Works.**

2. The most important irrigation works in India are those classed as Productive Works, or works the capital cost of which has been wholly or mainly provided from loan funds in the expectation that they would prove directly remunerative, and that the net revenue derived from them would fully cover all charges for interest within a reasonable time after their completion. This expectation is never likely to be realized in respect of any of the four works constructed in Bengal, of the seven in Bombay (Deccan and Gujarat), and of the Kurnool-Cuddapah Canal and Barur Tank in Madras. The capital outlay recorded against these thirteen works to the end of the year under review amounted to Rs. 9,92,25,208, on which the net revenue realised during the year yielded a return of 1.36 per cent compared with 1.46 per cent in the preceding year and with 1.45, 1.32, and 0.81, the averages of the past three triennial periods; the interest charges to the end of the year exceeded the net revenue by Rs. 10,34,22,997, the excess for the year being Rs. 19,53,007. The area irrigated by these works during the year was 1,127,070 acres.

3. These unfavourable financial results are, however, more than counter-balanced by the results attained on the forty remaining productive works now in operation, the net revenue on which during the year was equivalent to a return of 10.26 per cent on the capital outlay. The financial results, the area irrigated, and the mileage in operation for all the works of this class are shown separately by provinces in statements I and II.

4. Of the addition of Rs. 1,14,88,106, in the capital outlay of works in operation, including Native States, Punjab, during the year 1907-08, Rs. 55,28,573 is due to the transfer of the Dun and Bijnor canals in the United Provinces, the Kabul River Canal in the North-West Frontier Province, and the Lower Coleroon, Shariatpore, Tirukkoyilur, Cheyera, and Poiney Anicut systems in Madras, from the class of Minor Works to that of Major

Works of the Productive category ; Rs. 5,37,055 to the amalgamation of the Chopad Project with the Kurnool Canal in Madras ; and Rs. 22,17,517 to the inclusion for the first time of the Paharpur inundation canal in the North-West Frontier Province and the Divi pumping project in Madras in the list of Productive Works in operation. Of the balance, Rs. 12,66,621 was spent in the Punjab, Rs. 7,67,757 in the United Provinces, Rs. 4,58,607 in Madras, Rs. 3,20,238 in Burma, and Rs. 2,70,380 in Sind.

The net revenue from all the Productive Works in operation amounted to Rs. 3,37,23,120 and was less than that of the preceding year by Rs. 26,10,607. There was a decrease of Rs. 20,83,307 in the Punjab, Rs. 6,88,378 in the United Provinces, Rs. 5,20,300 in Sind and Rs. 1,60,727 in Bengal, and an increase of Rs. 6,64,537 in Madras and Rs. 2,13,743 in Burma.

The total irrigated area exceeded that of all other previous years except 1905-06. The steady increase in the area irrigated by the Productive Works in the last three triennia, i.e., 1907-08 to 1899-1900, is shown in Statement II. The average area irrigated in the triennium ending 1907-08 exceeded that of the preceding triennium by nearly two million acres, and that of the triennium ending 1901-02 by more than three million acres.

5. *Punjab*.—The area irrigated in the Punjab amounted to 5,515,386 acres, compared with 5,902,995 acres in 1906-07 and with 5,860,583 acres, 5,388,065 acres and 4,398,507 acres, the averages of the past three triennia. The net revenue from these works fell from Rs. 1,66,90,830 in 1906-07 to Rs. 1,45,29,180 in the year under review, the decrease being due partly to low supplies in the rivers during the rabi season, owing to the partial failure of the monsoon, and partly to heavy special remissions of water rate on account of damage caused by untimely rainfall to the wheat and gram crops on the Lower Chenab and Upper Bari Doab canals. The accumulated net revenue of the Lower Chenab canal to the end of the year under review after paying off the interest charges amounted to Rs. 3,81,90,225 against Rs. 2,81,81,632, the capital invested. The net revenue on the Lower Jhelum canal, which was opened in 1901-02, was Rs. 9,11,022, which is equivalent to 5.74 per cent on the capital outlay against 5.43 per cent in the preceding year and 1.09 per cent in 1905-06, previous to which year the revenue had not covered the working expenses.

6. *United Provinces*.—The total area irrigated by Major Productive Works in the United Provinces was 3,187,864 acres, compared with 2,408,467 acres in the preceding year, and 3,234,566 acres in 1905-06. The percentage of net revenue on the capital outlay was 8.56 against 9.53 in 1906-07, 5.95 in 1905-06, and 8.03, 7.39 and 7.08, the averages of the three preceding triennia. The accumulated net revenue of the Eastern Jumna canal to the end of the year, after paying off the interest charges, amounted to Rs. 2,86,75,202, or nearly six times the capital invested in the canal.

7. *Madras*.—The area irrigated in Madras was 3,324,115 acres, which exceeded all previous records. The net revenue in the year under review exceeded that of the previous year by Rs. 6,64,537 ; a little more than half of the increase was due to the transfer of the five works mentioned in paragraph 4 above from the class of Minor Works to that of Major Productive Works. On the Cauvery and Godavari Delta systems, which are the most remunerative works in the Madras Presidency, the percentage of net revenue on the capital outlay was 23.23 and 19.79, respectively. The accumulated net revenue on these two works up to the end of the year under review after paying off the interest charges amounted to Rs. 3,01,47,009 on the Cauvery Delta system and to Rs. 5,57,65,947 on the Godavari Delta system as compared with the invested capital of Rs. 36,42,040 and Rs. 1,40,89,964, respectively.

8. *Sind*.—The area irrigated in Sind was 1,111,229 acres as compared with 1,468,792 acres in 1906-07 and 1,393,932 acres in 1905-06. The net revenue fell from Rs. 20,33,511 in 1906-07 to Rs. 15,13,211 in the year under review, which was equivalent to a return of 5.88 per cent on the capital outlay, compared with a return of 7.98 per cent in 1906-07 and of 7.66 per cent in

1905-06. The decrease both in area and net revenue was due to the unfavourable supplies in the river.

9. *Bombay (Deccan and Gujarat).*—In Bombay (Deccan and Gujarat), the return on the capital was 2·50 per cent, compared with 2·42 per cent in the preceding year, and with 2·64, 2·06, and 1·85 per cent in the three preceding triennia. The works are small compared with those of other provinces; and the extent of the area irrigated by them shows little fluctuation.

10. *Bengal.*—In Bengal the irrigated area was 1,000,466 acres, of which 648,920 acres were irrigated by the Sone canals. The net revenue from the four Productive Works was equivalent to a return of 1·32 per cent on the capital outlay against 1·57 per cent in the preceding year and 1·61 per cent in 1905-06. The Orissa, Midnapore, and Sone canals are utilised both for irrigation and navigation purposes, while the Hijili Tidal canal is for navigation only. The navigation receipts on these canals have suffered from the competition of railways.

11. *Burma.*—In Burma the Mandalay canal yielded a net revenue of Rs. 3,09,353 against Rs. 1,97,262 in 1906-07 and Rs. 1,14,076 in 1905-06. On the Shwabo canal, which was opened for irrigation in 1906-07, the net revenue was Rs. 1,66,074, compared with Rs. 64,422 in the preceding year. The total area irrigated by the two works was 145,432 acres against 90,921 acres in 1906-07. The total net revenue from them was equivalent to a return of 4·73 per cent on the capital outlay against 2·69 per cent in the previous year.

12. *North-West Frontier Province.*—The area irrigated in the North-West Frontier Province was 202,317 acres, compared with 151,460 acres in 1906-07, the increase being due to the opening of the Paharpur inundation canal for irrigation and to the transfer of the Kabul River canal from the class of Minor Works to that of Major Productive Works.

13. At the end of the year 39,858 miles of Productive irrigation canals were in operation against 37,734 miles at the end of the previous year, the increase being mainly due to the transfer of five ancient systems of the Madras Presidency as mentioned in paragraph 4 to the head—"49—Irrigation Works" during the year.

14. In addition to the fifty-three Productive works now in operation, nine new works were under construction during the year, viz., the Môn and Ye-u canals in Upper Burma, the Naulakhi canal in Sind, the Upper Chenab, Upper Jhelum and Lower Bari Doab canals in the Punjab, the Upper Swat River canal in the North-West Frontier Province, and the Nagavalli river project and Siddapur Tank Project in the Madras Presidency. The capital outlay and interest charges of these works are shown in Statement III. The total outlay on them to the end of the year (exclusive of interest charges) amounted to Rs. 2,22,67,367, of which Rs. 91,97,168 were expended during the year. In addition to this sum Rs. 39,96,582 were spent on works now in operation, principally on extensions and improvements, which are likely to prove remunerative and to increase the efficiency of the systems. The total capital expenditure on irrigation works during the year therefore amounted to Rs. 1,31,93,750 against Rs. 1,25,45,920 in the previous year.

No capital expenditure was incurred during the year on navigation works.

## II.—Protective Works.

15. Protective irrigation works are those which have been sanctioned in consideration of their value as famine protective works, but without any expectation of their becoming directly remunerative. The cost of their construction is met from the famine insurance grant. There are thirty-two works so classed, fifteen of which are still under construction. Particulars of these works are given in statements IV, V, and VI.

16. The capital expenditure on the seventeen works in operation to the end of 1907-08 amounted to Rs. 2,70,83,899.

These works gave a net revenue of Rs. 4,44,143 of which the Betwa canal in the United Provinces accounted for Rs. 79,004, and the Nira canal (including the Shetphal tank) in Bombay Rs. 3,58,151. It will be noticed that the bulk of the net revenue was realised on the latter work which yielded a return of 5.57 per cent on the capital outlay. The net revenue from the tanks in the Central Provinces shows an increase of Rs. 1,027 as compared with last year, and the progress is expected to continue as irrigation developes and other works are completed.

17. At the end of the year there were 1,482 miles of open protective canals, against 1,218 miles at the end of the previous year. The area irrigated during the year was 355,709 acres, of which 102,018 acres were irrigated from the Rushikulya project in Madras and 66,469 from the Ken canal in the United Provinces, which came into operation during the year.

#### B.—MINOR WORKS.

##### III.—Works for which Capital and Revenue Accounts are kept.

18. There were ninety-three works so classed in 1907-1908, forty-one of which are in Bombay and thirty-two in Madras. In the Central Provinces three new works have been started. Of these ninety-three, six are purely navigation works, four being in Madras and two in Bengal.

19. The expenditure incurred on the construction of irrigation works alone amounted to Rs. 3,58,44,356 up to the end of 1907-1908, and the net revenue during that year to Rs. 23,29,751 or a return of 6.50 per cent on the capital outlay, against 8.41 per cent in the previous year. The decrease occurs mainly in Bombay (Sind) and Madras, the net revenue in the former shewing a drop of nearly 5 lakhs, in consequence of the indirect receipts on the Ghar and Fuleli canals having been abnormally high in 1906-1907, and in the latter of over 4 lakhs, owing to the transfer of five systems to the productive works' class. Although these works are constructed for the general improvement of the country, and not as remunerative works, yet many of them are paying considerably over 4 per cent on the capital invested.

In accordance with the recommendations of the Irrigation Commission, the eight minor works enumerated in paragraph four were transferred to the category of Major (Productive Public) Works with effect from 1st April 1907.

Nearly all the minor works in Sind return very high percentages; but as some large projects with which it is intended to amalgamate them are under consideration, their transfer to major works has been postponed for the present.

20. Excluding the area shown under Burma, viz., 444,112 acres, which is not under irrigation, but represents the area of cultivation on lands reclaimed by river flood embankments, the area irrigated by Minor Irrigation Works during 1907-1908 was 1,346,545 acres, against 1,804,994 acres in the previous year, or a decrease of 25.4 per cent. This is accounted for principally by the smaller areas irrigated in Madras and Bombay.

21. The Capital outlay to end of 1907-1908 on the six navigation canals amounted to Rs. 2,31,63,467 and the net revenue during that year to a *minus* figure of Rs. 1,20,939. The decrease occurs on all the works, and is due to an increase in the working expenses owing to heavy maintenance charges.

22. Statements VII and VIII show the financial results, the area irrigated, and the open mileage of individual works.

##### IV.—Works for which only Revenue Accounts are kept.

23. There are numerous Minor Works for which separate capital accounts are not kept, either because the works are too small, or because they have not been constructed by the British Government, which has simply undertaken their improvement and maintenance. For such works only revenue accounts are maintained; they are credited with a share of the land revenue depending on their maintenance, and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. Particulars for the year 1907-08 are shown in Statement X.

*V.—Works for which neither Capital nor Revenue Accounts are kept.*

24. There is a third important class of Minor Works chiefly existing in the Madras Presidency, for which neither capital nor revenue Accounts are kept. The Madras works include over 28,000 tanks and 6,000 irrigation channels, the improvements and repairs of which are executed by the Public Works Department, or, in the case of the smaller works, by civil officers: the expenditure during 1907-08 amounted to Rs. 27,99,650, of which about one-fourth was spent by civil officers. The areas irrigated by these small works in 1907-08 aggregated 3,295,815 acres, (or slightly less than the area irrigated by all the Major Works in the Presidency taken together), compared with 3,450,743 acres in 1906-07 and 3,349,979, 3,323,141, and 3,111,902 acres, averages of the three triennia covering the period 1899-1900 to 1907-08. The revenue derived from these works amounted to Rs. 82,91,659, compared with Rs. 92,42,134 in 1906-07, the decrease being due to the unfavourable character of the season.

25. The following table summarizes the results of irrigation works for all India during 1907-08 in comparison with those of the two previous years:—

*Financial and Irrigational Results of Irrigation Works in operation in India.*

Class of work.	Capital outlay to end of the year on works in operation.	Gross revenue during the year.	Net revenue during the year.	Percentage of net revenue on capital outlay to end of year.	Area irrigated.
	Rs.	Rs.	Rs.	Per cent.	Acres.
I and II.—Major Works. } I.—Productive } II.—Protective	44,34,70,088	5,09,88,867	3,41,72,263	7.71	14,874,029
III.—Minor works for which Capital and Revenue Accounts are kept (including works under construction).	5,90,07,823	41,90,083	22,08,812	3.75	1,790,657
IV.—Minor Works for which only Revenue Accounts are kept.	.....	58,38,706	19,50,051	...	1,925,764
V.—Works for which neither Capital nor Revenue Accounts are kept.	.....	84,42,301	37,24,017	...	3,357,981
Total 1907-08 ...	50,24,77,911	6,94,59,957	4,20,55,143	(a) 7.24	21,948,431
Total 1906-07 ...	48,87,84,154	7,35,56,194	4,74,40,754	(a) 8.19	22,224,949
Total 1905-06 ...	47,84,79,766	6,35,19,698	3,84,02,730	(a) 6.69	22,988,063

(a) Percentages calculated on works of classes I, II, and III.

The total area irrigated was nearly 22 million acres, while the value of the crops raised by the works for which capital accounts are kept is estimated at Rs. 60½ crores, or about 120 per cent of the capital outlay expended on them.

**ORDER.**—Ordered that this Review be forwarded to the Finance and Revenue and Agricultural Departments and to the Local Governments and Administrations in the Public Works Department, noted on the margin, for information.

The Governments of Madras, Bombay, Bengal, the United Provinces of  
Agra and Oudh, the Punjab, Burma and Eastern Bengal and Assam.  
The Honourable the Chief Commissioner of the Central Provinces.  
The Chief Commissioner of Coorg.  
The Honourable the Resident at Hyderabad.  
The Honourable the Agents to the Governor-General for Central India,  
Rajputana and Baluchistan.  
The Honourable the Agent to the Governor-General and Chief Commissioner,  
North-West Frontier Province.  
The Accountant-General, Public Works Department.

Ordered, also, that the Review be published in the Supplement to the *Gazette of India*.

Ordered, further, that a copy of the Review be forwarded to His Majesty's Secretary of State for India for information.

L. M. JACOB,

*Secretary to the Government of India.*

for Secretary, Railway Board.

*Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 46 }

CALCUTTA, SATURDAY, NOVEMBER 13, 1909.

**OFFICIAL PAPERS.**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 11th November 1909, based on the Indian Daily Weather Reports of the period.**

The most important feature in the weather of the past week was the continuance of low pressure conditions over the Andaman Sea, a type of pressure distribution which, while unfavourable for rainfall on the Madras coast, is favourable for rain in Lower Burma. Dry weather prevailed over by far the greater part of the country, and the only divisions where rainfall was above the average were the Bay Islands, Lower Burma and Malabar. Temperature was generally either normal or in slight excess. Humidity was in marked excess in Sind, Gujarat and the southwest of Rajputana, and in marked defect in the Deccan and on the Madras coast.

**Burma.**—All the observatories in the vicinity of the Andaman Sea received rain, and showers also occurred at Toungoo, Thayetmyo and Lashio. Skies were lightly to moderately clouded, and temperature was nearly normal.

**Northeast India, including Orissa.**—Shillong reported a light shower of rain on the 10th. Skies were almost free from cloud. Temperature was normal or in slight excess.

**The United Provinces, Central India and the Central Provinces.**—Skies were clear except for light cloud which appeared occasionally in parts of the Central Provinces. Maximum temperature was in general slight excess.

*Northwest India.*—A depression from Persia caused cloud in the extreme north and in the Indus valley, but in the rest of the division skies were practically cloudless throughout the week. Temperature was somewhat higher than usual in Baluchistan, the Punjab, the North-West Frontier Province and Sind.

*The Peninsula.*—A few falls of rain occurred in the extreme south. Skies were cloudy in Mysore and the Madras presidency, but there was very little cloud outside these areas. Day temperature was in excess in the Deccan.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

November 6th. Mergui 2'15".

„ 7th. Port Blair 1'56" and Slipper Island 1'25".

„ 8th. Port Blair 1'57", Rangoon 2'18", Calicut 2'39", Cochin 1'33" and Trivandrum 2'09".

„ 9th. Port Blair 2'10" and Ootacamund 1'32".

„ 10th. Port Blair 1'29".

The seasonal rainfall from the 30th April to date is 20 per cent. or more in excess in the Bay Islands, Bengal proper, Rajputana, the east and north Punjab and the North-West Frontier Province, and is in defect to the same extent in the Central Provinces, Central India, Baluchistan and on the north Madras coast.

DIVISION.	RAINFALL DATA FOR WEEK ENDING ON 11TH NOVEMBER 1909.			RAINFALL DATA FROM 30TH APRIL 1909 TO 11TH NOVEMBER 1909.			SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.	
	Average actual rainfall in inches.	Average normal rain- fall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

Secretary to the Government of India.

SIMLA;  
The 11th November 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Season and Crop Prospects for the week ending Saturday, 6th November 1909.

**Burma.**—The rainfall shows a general abatement and several districts of Upper Burma and Arakan report no rain. More rain is wanted in parts of the Thayetmyo district. In the Thaton district, owing to the continuance of heavy rain prospects of the paddy crop are less promising. With these exceptions, all standing crops promise excellent harvests. Cattle disease is reported in parts of the Minbu and Thayetmyo districts. Elsewhere, agricultural stock are healthy. Trade in unhusked rice at important trade centres has for the present almost ceased and there are no important changes in local prices.

**Eastern Bengal and Assam.**—The weather during the week was seasonable. Practically no rain was received except in parts of Dacca and Lakhimpur. In the Assam Valley, more rain is needed for spring crops. Transplantation of tobacco has commenced. Preparation of fields for spring crops still continues and sowing has commenced in many places. Harvesting of wet rice is in progress in the hills and reaping of winter rice has commenced in Sylhet. Prospects of winter rice, tobacco, tea and pulses are good and that of cotton fair. Slight damage to winter rice by insect pests is reported from Tippera and Cachar. The average price of common rice has fallen by about 1 per cent. Cattle disease prevails in five districts.

**Bengal.**—There were light showers of rain in parts of Midnapore, Nadia, Murshidabad, Balasore and Puri. There was no rain in the rest of the Province. Paddy on high lands is being irrigated in Patna and Darbhanga and more rain is wanted for high land paddy in Bankura and Bhagalpur and for spring crops in Palamau. Sowings of spring crops are in progress. Harvesting of early winter paddy has commenced in Shahabad, the Sonthal Parganas, Puri, Sambalpur, Ranchi, Palamau, Manbhum and Singhbhum. Prospects of the crop are, on the whole, good. The price of common rice has risen in Nadia, Jessore, Shahabad, Hazaribagh and Palamau and has fallen in Hooghly, the 24-Parganas, Patna, Gaya, Muzaffarpur, Darbhanga, Monghyr, Cuttack, Ranchi, Manbhum and Singhbhum. Cattle disease is reported from Burdwan, Midnapore, Nadia, Patna, Gaya, Muzaffarpur, Darbhanga, Bhagalpur, Purnea, the Sonthal Parganas and Cooch Behar and from the Orissa and Chota-Nagpur Divisions, excepting Balasore, Ranchi and Singhbhum. The fodder and water supply is sufficient throughout the province.

**United Provinces.**—No rain fell during the week. Harvesting and threshing of late autumn crops, sowings of spring crops and picking of cotton are in progress. Standing crops are in good condition but late rice has suffered in places from insufficient rain. Germination of spring crops is good. The condition of cattle is satisfactory but cattle disease continues in 18 districts. Fodder and water are sufficient. Markets are well supplied. Prices have risen in three districts; have fallen in 14; and are stationary elsewhere.

**Punjab.**—No rain fell during the week. The condition and expected yield of standing autumn crops are generally good to average. They are poor in parts of Shahpur and Mianwali owing to prolonged drought. The outturn of cotton is reported below average from parts of Lyalpur. Harvesting of autumn crops continue. Sowings of spring crops continue satisfactorily. Standing crops are being damaged by rats in Ferozepore. Prices are generally unchanged but there is a slight upward tendency in certain districts. The condition of cattle is generally good. Fodder is sufficient except in parts of Shahpur and Mianwali. Complaints of a short water supply continue to be received from the Samundri tahsil of the Lyallpur District.

**North-West Frontier Province.**—No rain was received during the week. It is wanted all over the Province. The condition of standing crops is generally average on irrigated areas and below the average on unirrigated lands. Harvesting of autumn crops continue. The outturn is generally average, but in Dera Ismail Khan it is reported below the average owing to damage done by insects. Sowings of spring crops are in progress. The water-supply and fodder are sufficient except in the Shigga circle of the Marwat tahsil in the Bannu district. Irrigation from the Paharpur canal in the Dera Ismail Khan district is still stopped. The condition of cattle is generally good throughout the Province except that cattle disease is reported in some villages of the Charsadda tahsil in Peshawar. The health of the people is good except that malarial fever is said to be

prevalent in the Bannu district and in some parts of the Peshawar district. Prices, except that of *bajra*, show a slight tendency to rise. Prices :—wheat 11½ to 12½ ; gram 15½ to 17 ; maize 13½ to 21½ ; *bajra* 14 to 17½ ; and barley 19½ seers per rupee.

**Jammu.**—There was no rain during the week. Prices are stationary. Wheat sells from 10 to 14 and maize from 14 to 24 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type prevails in three tahsils of the Province. Fodder is sufficient.

**Kashmir.**—There was no rain during the week. As a result of the last flood effects the condition of autumn crops was below the average. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

**Rajputana.**—Autumn crops and prospects are good. Harvesting of autumn crops and ploughing and sowing of land for spring crops continue. Cattle disease prevails in places in Mewar and Karauli. Fodder is sufficient. Prices are steady or falling except in Bikaner, Mewar and Alwar.

**Central India.**—No rain fell during the week. Harvesting of autumn crops and sowing of spring crops continue. Crops have been damaged slightly in parts of Gwalior, Bundelkhand and Bhopawar. Agricultural stock are satisfactory except for some cattle disease in parts of Indore, Baghelkhand, Bundelkhand and Bhopawar. Prices are falling slightly in Bhopawar, are fluctuating in Indore and are stationary but high elsewhere.

**Central Provinces.**—There was no rain during the week. Harvesting of autumn crops, picking of cotton and sowing of spring crops are in full swing. Standing crops are in good condition but a shower would improve them in Chhindwara. Cold weather *juar* plants were damaged in the Garcheroli tahsil of the Chanda district by insects. Germination of spring crops is reported satisfactory everywhere and prospects are favourable. Fodder and water are adequate and cattle are doing well. Prices :—*juar* became dearer by 1 seer in Nimar and Amraoti and by 2 seers in Chanda and Yeotmal. Elsewhere, prices of staple food grains remained nearly stationary.

**Feudatory States.**—There was no rain during the week. Insects continue to damage rice in places in Bastar. Otherwise, the condition of standing crops is good. Germination of spring crops is reported satisfactory. The supply of fodder and water is sufficient. Prices :—wheat in Kawardha fell by 1½ seers and rice in Raigarh rose by 1 seer per rupee.

**Bombay.**—Moderate rain fell during the week in Ratnagiri, Kanara, Belgaum, Savantvadi and Kolhapur and slight rain in Surat, Colaba, Poona, Satara, Bijapur and Dharwar. Rain is needed in parts of Kanara, the Deccan and Bijapur. Standing crops are suffering from insufficient moisture in Kolhapur. They have been damaged slightly by rats in Hyderabad; by insects in Hyderabad, the Karnatak and Kolhapur; and are generally good elsewhere. The autumn harvest is progressing everywhere and sowing of spring crops is general. Cotton picking is progressing in Hyderabad, Thar and Parkar, Ahmedabad, Khandesh and Ahmednagar. Threshing is in progress in Hyderabad, the Upper Sind Frontier, Kaira, Broach, Thana, East Khandesh and Mahi Kantha. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and are generally in good condition. Drinking water is generally sufficient. Irrigation water is deficient in parts of West Khandesh and Nasik. Grain stocks are sufficient. Prices have risen in East Khandesh, Sholapur, Bijapur and Dharwar and are stationary elsewhere. The quantity purchasable per rupee is in Sind 3 to 35 per cent.; in the Konkan 2 to 31 per cent.; and in the Karnatak 6 to 29 per cent. less than the normal. In Gujarat the quantity purchasable per rupee ranges from 3 per cent. more than the normal to 17 per cent. less and in the Deccan from 15 per cent. more than the normal to 13 per cent. less.

**Hyderabad.**—The rainfall during the week was 3 cents. The rain was scanty. Falls were received in 5 out of the 8 talukas of the Raichur district, the average for the district being 41 cents. There were slight showers in parts of the Nalgonda and Warangal districts, averaging 11 and 4 cents, respectively. There was practically no rain in other places. The autumn crop is generally fair to good except in parts of the Raichur district and some other tracts. Harvesting of the crop is nearing completion in some districts and continues in others. The early rice crop is fair to good but needs more rain. The crop is being harvested in parts. Sowings of spring crops still continue. Operations in connection with spring crops have been suspended for want of sufficient rain in the Khammam and Pakhal talukas. The crop is being weeded in parts. It is in need of more rain in the Warangal and Medak divisions and has been damaged to some extent in parts of the Nalgonda and Medak districts. Lands are under preparation for late rice and sowings have begun in a few places especially in the Mahbubnagar district. Cattle disease prevails

in 8 talukas. Water scarcity is reported from the Lingsugar taluka. Prices :—wheat 7 ; coarse rice 6 ; and *juar* 15½ seers per rupee. White *juar* is selling in Hyderabad city at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is nine seers each in the Chinnur and Rajpura talukas of the Aditabad district and the lowest 28 seers in the Nilanga taluka of the Bidar district.

**Mysore.**—The rainfall during the week was good in Bangalore, Kolar, Mysore, Hassan, Kadur and Shimoga and fair elsewhere. Prices of food grains have fallen slightly in Bangalore, Kolar and Hassan and are steady elsewhere. Standing crops are in good condition but more rain is needed for dry crops in parts of Bangalore, Kolar and Tumkur. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—The rainfall during the week was 74 cents. Rice is in good condition. Picking of cardamom continues. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall during the week was good in Malabar, the Nilgiris, Madura, South Canara, Coimbatore, Trichinopoly, Tanjore and Tinnevely ; *nil* in Madras ; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Anantapur, Nellore, Chingleput and Tinnevely. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Gangam, the Deccan and Tanjore require more rain and some in parts of the Circars, Nellore and Chingleput are withering. Harvests continue with outturn mostly fair to normal. Pasture is sufficient except in parts of Bellary and Nellore. Fodder is scanty in parts of Godavari, Bellary and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in 11 districts ; has fallen in 8 ; and has risen in 4. The prices of millets have fluctuated as follows :—*Ragi* is stationary in 9 districts ; has fallen in 7 ; and has risen in 5. *Cholam* is stationary in 4 districts ; has fallen in 7 ; and has risen in 3. *Cumbu* is stationary in 2 districts ; has fallen in 9 ; and has risen in 4. The public health is generally good. Prospects are generally good. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

R. W. CARLYLE,

Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

No. 47.]

CALCUTTA, SATURDAY, NOVEMBER 20, 1909.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 18th November 1909, based on the Indian Daily Weather Reports of the period.**

The low pressure conditions over the southeast of the Bay resulted on the 13th in the formation of a cyclonic storm, which moved northwards along the coast of Burma and finally broke up in eastern Bengal on the 16th. It was apparently a storm of only feeble intensity, but it was the cause of widespread rain over Burma, and moderate to heavy rain in the south of Eastern Bengal and Assam. Practically no rain fell in other parts of the country. Temperature was higher than usual in the northwest.

**Burma.**—Rainfall occurred in all parts of the province and was most widespread on the 14th and 15th. Cloud was moderate to heavy. In the northern districts maximum temperature was in defect and the minimum in excess.

**Northeast India, including Orissa.**—The depression in the Bay gave rain in the south of Eastern Bengal and Assam, Cox's Bazar on the 15th reporting 6'36" and Chittagong 4'62". Skies were cloudy in the south and east of the division and clear elsewhere. Temperature at night was in excess in the area of cloud: the rainfall caused a large fall in day temperature in the southeastern districts.

**The United Provinces, Central India and the Central Provinces.**—Skies were cloudless. Temperature was normal or in excess, the excess occurring principally in the day time.

*Northwest India.*—Skies were clear. Weather was warmer than usual in the Punjab and the west of the division.

*The Peninsula.*—A few light falls of rain occurred in the extreme south. Skies were cloudy in the south and along the east coast and clear over the remainder of the Peninsula. Temperature was in excess in parts of Madras and of the Deccan.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

November 12th.	Monywa 1'03" and Minbu 2'56".
" 13th.	Slipper Island 1'25" and Diamond Island 3'06".
" 14th.	Minbu 1'76".
" 15th.	Akyab 3'62", Chittagong 4'62" and Cox's Bazar 6'36".
" 16th.	Akyab 2'60", Lashio 1'30", Silchar 2'16" and Chittagong 1'60".
" 18th.	Maymyo 1'54".

The rainfall of the week was above the average in Burma and Eastern Bengal and Assam. No important change has been introduced in the departures from the normal of the rainfall for the period commencing on the 30th April 1909. An excess of twenty or more per cent is still shown for the Bay Islands, Bengal proper, Rajputana, the east and north of the Punjab and the North-West Frontier Province and a similar defect for the Central Provinces, Central India, the north Madras coast and Baluchistan.

DIVISION.	RAINFALL DATA FOR WEEK ENDING ON 18TH NOVEMBER 1909.			RAINFALL DATA FROM 30TH APRIL 1909 TO 18TH NOVEMBER 1909.				
	Average actual rainfall in inches.	Average normal rain- fall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.

G. C. SIMPSON,  
for Director-General of Observatories.  
R. W. CARLYLE,  
Secretary to the Government of India:

SIMLA ;  
The 18th November 1909.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Season and Crop Prospects for the week ending Saturday, 13th November 1909.

**Burma.**—Heavy rainfall is reported from the eastern side of the Irrawaddy delta and will probably be more or less prejudicial to rice crops. Elsewhere the majority of districts report slight showers. Standing crops continue to thrive. Agricultural stock are generally healthy and the progress of agricultural operations is normal. Trade in unhusked rice has almost ceased. Prices are normal.

**Eastern Bengal and Assam.**—The weather was cloudy and threatens to be severe in Bakarganj and the neighbourhood. Good rain has fallen in Chittagong but elsewhere there was no rain except light showers in a few stations. Transplantation of tobacco and sowing of mustard and other spring crops are in progress. Harvesting of winter rice has commenced and prospects are good; but slight damage by insect pests is reported from Cachar and Sylhet. Prospects of tobacco, tea and pulses are good and those of cotton and sugar-cane fair. The average price of common rice has fallen by about 1 per cent. Cattle disease prevails in Malda, Kamrup and Nowgong.

**Bengal.**—Light showers fell in parts of Burdwan, Midnapore, the 24-Parganas and Nadia. There was no rain in the rest of the Province. More rain is wanted for upland paddy in Shahabad and Bhagalpur and for early sown spring crops in Patna and Palamau. Harvesting of winter rice and sowing of spring crops are in progress. Prospects are on the whole favourable. The price of common rice has risen slightly in Burdwan, Jessore, Cuttack, Angul and Manbhum and has fallen in Nadia, Murshidabad, Khulna, Gaya, Muzaffarpur, Monghyr, Puri, Hazaribagh, Ranchi and Palamau. Cattle disease is reported from Burdwan, Midnapore, Nadia, Jessore, Darbhanga, Cuttack, Angul, Sambalpur, Palamau, Manbhum, and from the Bhagalpur Division, excepting Darjeeling. The fodder and water-supply is sufficient throughout the Province.

**United Provinces.**—No rain fell during the week. Agricultural operations are well advanced. Harvesting of late autumn crops, sowing of spring crops and picking of cotton continue. Sugar-cane pressing has commenced. Germination of spring crops is uniformly good. The condition of cattle is good though cattle disease is reported from eighteen districts. Fodder and water are sufficient. Markets are well supplied. Prices have fallen in 14 districts; have risen in 2; and are stationary elsewhere.

**Punjab.**—No rain fell during the week. Autumn crops are being harvested. The condition and expected yield of autumn crops are generally good to average but are poor in parts of Mianwali owing to prolonged drought. Sowings of spring crops continue satisfactorily and those which have germinated are generally good, to average. Prices are generally unchanged but there is a slight downward tendency in some districts. The condition of cattle is generally good. Fodder is sufficient except in parts of Shahpur and Mianwali. The water supply is scarce in parts of Mianwali. Complaints of a short water supply are being received from the Samundri tahsil of the Lyallpur district.

**North-West Frontier Province.**—No rain fell during the week. It is needed all over the Province. Standing crops are generally average on irrigated lands and below the average in unirrigated areas. Harvesting of autumn crops still continues and the outturn is average except in Dera Ismail Khan where it is reported below the average owing to damage done by insects. Pressing of sugar-cane has commenced in the Bannu district. Sowings of spring crops are in progress. The water supply and fodder are sufficient throughout the Province except in the Shigga circle of the Marwat tahsil in the Bannu district. Irrigation from the Paharpur canal in the Dera Ismail Khan district is still stopped. Cattle are generally in good condition throughout the Province. Malarial fever is still reported in some parts of the Peshawar and Bannu districts. Prices, except that of maize, show a slight tendency to rise. Prices:—wheat 11½ to 12½; gram 15½ to 18; maize 13½ to 21½; bajra 15 to 18; and barley 20½ seers per rupee.

**Jammu.**—There was no rain during the week. Prices are fluctuating. Wheat sells from 10 to 14 and maize from 16 to 25 seers per rupee. The condition of standing crops is fair. Cattle disease of mild type prevails in two tahsils of the Province. Fodder is sufficient.

**Kashmir.**—No rain fell during the week. As a result of the last flood effects, the condition of autumn crops is below the average. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

**Rajputana.**—Harvesting of autumn crops and sowing of land for spring crops are in progress. Standing crops and prospects are good. Cattle disease prevails in Mewar and Karauli. Fodder is sufficient. Prices are rising in Marwar and Banswara and are steady or falling elsewhere. Cotton is being picked in Mewar, Jaipur, Ajmer and Merwara.

**Central India.**—No rain fell during the week. Harvesting of autumn crops and sowing of spring crops continue. Crops have been damaged slightly by insects in parts of Gwalior, Indore and Dhar. Agricultural stock are satisfactory except for some cattle disease in parts of Indore, Baghelkhand, Bundelkhand and Bhopawar. Prices are stationary but high. Poppy sowing is in progress in Baghelkhand and Malwa and land is under preparation for sowing elsewhere.

**Central Provinces.**—The weather has been clear. The days are warm and the nights and mornings cool. Reaping and threshing of autumn crops and picking of cotton continue. Sowing of spring crops is in progress and germination is successful. The condition of standing crops is generally good but rain would be welcome in Seoni, Narsinghpur, Chhindwara and Chanda. The supply of fodder and water is sufficient everywhere. Agricultural stock are in good condition. Prices:—*juar* rose in Nimar and fell in Chhindwara by 1 and 4 seers per rupee respectively. Variations in the prices of staple food grains are unimportant elsewhere.

**Feudatory States.**—No rain fell during the week. Harvesting and threshing of autumn crops, picking of cotton and sowing of spring crops continue. Sugar-cane is in a flourishing condition in Raigarh and Sakti. Rice has suffered considerably in places in Bastar for want of timely rain. Prospects are generally favourable. Fodder and water are adequate. Prices:—wheat in Kawardha and Bastar; *kodon* in Khairagarh and rice in Sarangarh rose, and rice in Khairagarh and Raigarh and wheat in Sarangarh fell, by 1 to 2 seers per rupee. Prices were steady elsewhere or fluctuated slightly.

**Bombay.**—Slight rain fell during the week in Kolhapur. Rain is needed in parts of Kanara, the Deccan and Bijapur. Standing crops are suffering from insufficient moisture in Poona and Kolhapur. They have been damaged slightly by insects in Hyderabad, the Karnatak and Kolhapur and are generally good elsewhere. The autumn harvest is progressing everywhere. Sowing of spring crops is general. Cotton picking is progressing in Hyderabad, Thar and Parkar, Ahmedabad, Khandesh, Ahmednagar and Baroda. Threshing is in progress in parts of Sind, Thana, Colaba, East Khandesh and Baroda. The fodder supply is generally adequate. Agricultural stock are sufficient except in parts of the Deccan and are generally in good condition. Drinking water is generally sufficient. Irrigation water is deficient in parts of West Khandesh and Nasik. Grain stock are sufficient. Prices have fallen in Hyderabad, Surat, Ratnagiri and Kanara; have risen in Sukkur, the Panch Mahals and Bijapur; and are stationary elsewhere. The quantity purchasable per rupee is in Sind 3 to 35 per cent.; in the Konkan 2 to 32 per cent., and in the Karnatak 12 to 29 per cent. less than the normal. In Gujarat the quantity purchasable per rupee ranges from 3 per cent. more than the normal to 17 per cent. less and in the Deccan from 15 per cent. more than the normal to 13 per cent. less.

**Hyderabad.**—No rain fell during the week. Rain is urgently required except in parts of the Raichur district. Autumn crops are generally fair to good and are being harvested. Harvesting is nearing completion in some districts. Autumn cotton is being picked in most parts of the Maharatwada country. The early rice crop needs more rain. The crop has withered or is withering in many parts of the Telingana, especially in the Warangal and Karimnagar districts. Harvesting has begun in some tracts. Sowings of spring crops are still in progress but have been suspended for want of rain in the Huzurnagar taluka of the Nalgonda district and in the Pakhal and Yellareddi talukas of the Warangal district. The castor seed crop is withering in parts. More rain is needed on the whole for operations in connection with spring crops throughout the Telingana. The spring crop has been damaged to some extent by insects in parts of the Medak and Warangal districts. Late rice lands are under preparation and late rice is being sown in parts of the Nalgonda and Mahbubnagar districts. Cattle disease prevails in seven talukas. Podder scarcity prevails in four talukas and water scarcity is felt in parts of the Linsugar taluka of the Raichur district and is expected, in future, in the Palancha and Warangal talukas of the Warangal district and the Mahadeopur taluka of the Karimnagar district. Prices:—wheat 7½; coarse rice 7; and *juar* 15½ seers per rupee. White *juar* is selling in Hyderabad City at 12½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers each in the Chinnur and Rajura talukas and the lowest 28 seers in the Nilanga taluka of the Bidar district.

**Mysore.**—No rain fell during the week. Prices of food grains are generally steady. Standing crops are in good condition but more rain is needed for late sown dry crops in Bangalore and Kolar. Prospects of the season are generally good. Cattle are generally healthy. Water and fodder are available.

**Coorg.**—Rice is in good condition. Picking of cardamom continues. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

**Madras.**—The rainfall during the week was good in Madura and Tinnevely; light to fair in Malabar, the Nilgiris, the Vizagapatam Agency, Coimbatore and Tanjore; and *nil* elsewhere. Irrigation supplies are sufficient except in parts of the Circars, Bellary, Anantapur, Nellore, Chingleput, South Arcot and Tinnevely. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of the Circars, the Deccan, Nellore, Chingleput and Tanjore require more rain or are withering. Harvests continue in parts with outturn mostly fair to normal. Pasture is sufficient except in parts of Bellary, Cuddapah and Nellore. Fodder is scanty in parts of Godavari, Bellary and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in 15 districts; has fallen in 5; and has risen in 3. The prices of millets have fluctuated as follows:—*Ragi* is stationary in 7 districts; has fallen in 8; and has risen in 6. *Cholam* is stationary in 1 district; has fallen in 4; and has risen in 9. *Cumbu* is stationary in 5 districts; has fallen in 2; and has risen in 8. The public health is generally good. Prospects are generally good. The condition of the labouring classes is good and employment is available. Grain stocks are generally sufficient.

R. W. CARLYLE,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.  
SANITARY.  
PLAGUE.

Calcutta, the 18th November, 1909.

The following preliminary statement of plague seizures and deaths reported in India during the week ending the 13th November 1909, is published for general information:—

Presidency or Province.	Division.	Districts, States, towns of 50,000 or more inhabitants and ports.	Plague seizures.	Plague deaths.

FREDERICK NOEL-PATON,  
Director-General of Commercial IntelligenceB. ROBERTSON,  
Secretary to the Government of India

Calcutta, November 19, 1909

SUPPLEMENT TO  
**The Gazette of India.**

No. 48.]

CALCUTTA, SATURDAY, NOVEMBER 27, 1909.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 25th November 1909, based on the Indian Daily Weather Reports of the period.**

A feeble disturbance appeared in the southwest of the Bay on the 21st and was the cause of a few light falls of rain on the Coromandel coast. It appeared to move northwards during the next twenty-four hours, but failed to develop. Weather was dry over nearly the whole country, the only areas where any rain was received being Burma, the south of Eastern Bengal and Assam and the south of the Peninsula.

The air was very much drier than usual in the Deccan and Mysore.

*Burma.*—Most of the observatories in the northern half of the province received some rain during the week. Skies were lightly to moderately clouded. Temperature was approximately normal.

*Northeast India, including Orissa.*—A few light falls of rain occurred in Eastern Bengal and Assam. Skies were clear or cloudless. Up to the 22nd night temperature was in excess in Eastern Bengal and Assam, but elsewhere temperature was nearly normal.

*The United Provinces, Central India and the Central Provinces.*—Skies were cloudless. Temperature was normal, except for a defect at night in parts of the Central Provinces.
